

DESIGN: SIMON MORASI PIPERČIĆ

Convert is a modular seating system providing various combinations of arranging compositions in space. It is also flexible within its structure and can be modified in time. Changing the positions of seating modules, fixed backrests or the ones with a mechanism and platform for storage, offers a variety of different possibilities applicable both for households and public spaces. Essentially discreet in its shape, through disposition of structural elements, selection of material and several types of cushions, the system changes its character and function depending on the user's preference.

STRUCTURE	multilayer plywood
SUSPENSION	elastic webbing
SEAT	HR foam
BACKREST	HR foam
LEGS	metal
FINISH	powder coated matte
SIDEBOARD	solid wood
