FITNESS EQUIPMENT FINANCING PROGRAM

Cash-Flow Friendly • Flexible Terms • Potential Tax Advantages Stay Ahead of Technology • Expert Advice and Service

The Benefits of Equipment Financing with G&G Fitness:

- **Build Your Business Now -** Leasing offers you the ability to acquire your equipment now, so it can help you generate profits to fund additional growth.
- Less Down and Affordable Monthly Payments Leasing usually requires less up-front cash than conventional financing. Often times the equipment can be 100% financed and a lease can be structured so it's affordable for you.
- Stay Ahead of Technology An equipment lease delivers flexibility so you never have to worry about high-tech obsolescence.
- **Healthy Balance Sheet -** In many cases, leases may not be considered as debt by financial institutions.
- **Tax-Friendly** Lease payments can be tax-deductible as an operating expense or fully depreciated, depending on the structure of your lease.
- Simplified Approval Process Once we receive your completed application, your lease will be promptly reviewed and processed.

Almost Any Type of Fitness Equipment Can Be Leased.

Consultation — We will meet with you to recommend and structure a lease that meets your specific needs and budget.

Proposal — You will promptly receive a proposal with leasing terms and conditions for the Leasing Program.

Commencement — The lease commences once the equipment has been delivered, is working properly, and your authorized representative signs the Certificate of Acceptance.

A Lease to Meet Your Fitness Needs.

With leasing there's no one-size-fits-all. G&G fitness will tailor a lease to best meet your business situation. The following lease structures can be included under one Master Lease. Establishing a Master Lease Agreement provides you with a pre-approved lease line to expedite future equipment acquisitions.

Capital Lease

- Ideal for companies that wish to own the equipment at lease end
- Full purchase price is spread over term of lease; at lease end, you own the equipment for minimal payment
- Various Fair Market Value end-of-lease options available (i.e. FMV/10% or balloon payment)

Operating Lease

- Typically used for equipment which will maintain its value
- Used for "off-balance sheet" accounting practices
- Provides numerous lease-end options

Leasing is a Better Way to Acquire the Equipment You Need.

We specialize in cash-flow friendly equipment leasing solutions that give you all the benefits of equipment ownership without the prohibitive up-front costs. So you won't have to put off until tomorrow what you really need today to help your business grow. Plus, leasing versus buying offers you the opportunity for improved cash flow and potential tax advantages.

Expertise Makes Leasing Easy.

We have made it our highest priority to help you easily and cost-effectively secure the equipment and technology you need to run a profitable, successful business.

Our consultative approach to each and every leasing transaction ensures that you understand all the leasing options available, while we work together to develop a customized lease agreement that best fits your specific business requirements.

Our streamlined application and approval process - combined with the highest level of personal service every step of the way - helps simplify the process so you can concentrate on growing your business.
