

HOW TO FIND YOUR BOAT PROPELLER

3 Blade
 4 Blade
 Left Rotation
 Right Rotation (standard)

1. Engine

Find your engine manufacturer & hp range or model in the column below. Above the column includes the group's horsepower range, gearcase size, and prop shaft spline count. Use all elements to find your exact engine model.

2. Installation Kit

Installation kit required for selected engine application is located in the column directly to the right of the Engine Brand column.

3. Prop Group

The prop group that will work with the selected application is represented by a shape with a number within it (some shapes do not have numbers).

4. Exact Prop

Choose the propeller that best fits your application, if you need a pitch & size recommendation please use the Prop Wizard online at <http://tpprops.com>.

A SAFER PROP THAT'S SEA LIFE FRIENDLY

The NEW Aegis® Propeller System uses unique geometry to produce a propeller that will minimize the potential damage from a prop strike to marine mammals, turtles, and other sea life at low boat speeds. It will also reduce the occurrences of incidental contact injury by bathers and boaters when the boat is at idle or stopped. They are available in 3 blade right rotation models with a variety of diameter & pitch options to run on most common boat types. See Turning Point's Master Catalog or visit www.tpprops.com for application information.
