

OPLA USES TRACEABLE RECYCLED METALS

OPLA has been working with over the past years with its metal suppliers to ensure the traceability of the metals purchased to produce our chains. We can now certify that we are working with fully traceable & recycled gold and silver in our manufacturing processes.

1) CHAIN OF CUSTODY (COC)

The Chain of Custody certificate is the highest standard in the precious metals sector. This certificate ensures the adequate provenance of the metals used:

- Allows for traceable material along the supply chain.
- Guarantees responsible sources
- Requires third party auditing

The certificate is issued by the Responsible Jewelry Council – RJC.

2) ECOSILVER

ECOSILVER Standard ensures the sourcing of the silver is 100% recycled. Eco silver is 100% produced from Jewelry, medical, electronic parts and other silver wastes.

The quality of the silver remains the same with the only difference it is fully ecologically recycled.

3) FAIR TRADE

Our gold is also purchased under the fair-trade certifications

4) RESPONSIBLE JEWELRY COUNCIL

OPLA has become member of the Responsible Jewelry Council. Through the RJC independent auditing process, OPLA will become one of the first European chain manufacturers to ensure the best practices in the Jewelry manufacturing processes

5) ISO 9001 AND ISO 14001

OPLA is already ISO 9001 certified and working on obtaining the 14001 environmental certification.

6) GLOBAL ENVIRONMENTAL STATEMENT

Please refer to our GES for further information on our Environmental policy and activities

We will continue delivering the highest quality chains while minimizing our environmental footprint
