## Ampacity

### Quartz Movement

#### Mode 1: How to set the time

- Pull the crown out and rotate it until you reach the correct time
- Then push the crown back in to start the watch

**Tip:** Make sure to completely push the crown all the way in to avoid any water or debris getting in the watch

#### Mode 2: How to set the date

- Pull the crown out and rotate it clockwise to reach the day before the date
- Pull the crown out to the second grid position and rotate the crown to return the hands to zero
- If you are doing this in the afternoon, the hour hand needs to pass 12:00
- Make sure to push the crown all the way back into place to ensure that nothing can get in the watch

#### Mode 3: How to operate the outer dial

- Rotate the outer gear until the hour hand coincides with the scale "0" on the dial
- After this the watch should be able to read time according to the indication of the minute hand on the dial

**Tip:** the outer gear dial can only be rotated in a counter clockwise direction

1

## II. The time difference between two locations

- The local time is the normal time on the dial
- By rotating the bright point on the outer gear of the dial for several grids, you make the rotated steps the time difference
- If you want to know the time, the number that the inner dial Shows is the local time and the number the outer dial shows is The time of the other location

## III. Warning

- Do not try to open the cover of the watch or remove it
- Do not swim or do any type of water sports while wearing this watch
- This watch cannot be used in hot water or under high temperatures
- Intense electrostatic charges can cause abnormalities in the display and even results in damage to the interior of the watch
- You should replace rubber seal every 2 to 3 years
- Do not make the watch band too tight around your wrist
- If there is water droplets within the surface of the watch. You should send it back to the distributors
- The only equipment necessary to clean the watch is with a soft dry cloth or neutral detergent (Nothing abrasive or corrosive)
