III. Mode Instructions

1. Time Mode

In time mode the screen shows the current time, day and date. All other modes are disabled in time mode.

Setting Time: In Time Mode press the Mode button three times to set all the parameters of time and date on your watch. The SPL/ADJ button will cycle through the various parameters i.e. minutes, hours, seconds and date.

When a parameter is highlighted you can use the Start/Up Button to cycle through the desired number. Once you are finished setting the time press the Mode Button to return to standard display.

2. Stopwatch Timing Mode

Press the mode button in Time Mode to enter Stopwatch Mode. The letters ST will display on your watch if you have correctly entered stopwatch mode. Press the Start/Up button to begin the stopwatch. Press it again to stop the watch. Use the SPL/ADJ Button to clear your time back to zero.

3. Alarm Mode

In Time Mode press the Mode Button twice to enter alarm mode. Here you will be able to set and activate alarms. Your display will show AL when you have entered alarm mode. Press the Start/Up Button to turn the alarm on and off. Set your alarm by pressing the SPL/ADJ Button to select hour and minute. Then press the Start/Up Button to modify the alarm timer. Hit the Mode Button to finish setting your alarm.

4. Silence Alarm:

Press any of the Buttons on the watch to silence the alarm while it is sounding
