Installation

- 1** *Firmly connect the provided Ethernet Cable* from your VeraPlus to your *Wi-Fi router* (or other Internet source).
- 2** *Firmly connect the AC Power Adapter* to VeraPlus and plug it into an AC outlet. VeraPlus has no on/off switch. It will power up as soon as you plug in the AC adapter.

- 3** *To setup your controller, go to <http://home.getvera.com>*

If you are a new user, click the **"I have a new controller"** button on the screen. Agree to the terms and conditions. Then select your Controller.

If you already have an account, please login. Click the **"Add another controller"** button. Then select your Controller.

Follow the Setup Instructions.
