Why Choose Simply Implants?

Simply Implants™ designed the system to feature three styles of implants. All parts and accessories are compatible with all three styles of implants. Simply Implants™ are compatible with 6 other systems on the market. Simply Implants™ also took parts and merged them together so a dentist would not have to buy more inventory. Simply Implants™ surgical kit is lean and mean…it’s simple for any dentist to be able to learn and use the system. Simple to place and simple to restore.

The Simply Implants™ system was designed so it does not have many parts. Some parts were merged to save cost, time and streamline the process. Designed with an SI Cheat Drill System to save on how many drills a dentist requires in surgery. The Simply Implants™ system is designed to quickly restore implants with minimal effort. This design makes the system quick, simple and with the same level of quality as our competitors.

Simply Implants™ is the only complete system:

1. We provide you with premium titanium implants at just $99 each.

2. We train you on the product, placement and restoration.

3. We support your practice on the use of the product.

Simply Implants™ is the only implant company with its own Institute (SI Institute) training you on the product, placement and restoration.

Our Mission and Vision

Simply Implants™ is the only company that created an implant system based on the business of dentistry. Simply Implants™ understands the operating costs of a dental practice and the fees dentists earn for implant procedures. Most implant companies base their pricing on fees earned by specialists and the implant company’s primary focus on their company’s profits. Simply Implants™ is the implant company which is changing the implant market by placing the power back into the dentist’s hands.

$99 DENTAL IMPLANTS

No other implant company has developed a product designed and created with premium materials to produce a high-grade implant with the primary focus of maintaining top quality while keeping costs down. Simply Implants™ designed the system to be incorporated into any practice whether insurance-based or fee-for-service. Dentists will never again have to be concerned with the “cost ratio in comparison to gross revenue” again.

- No more CRAZY costs.
- No more worry about insurance fees compared to the implant purchase cost.
- No more worry about costs if an implant fails.
- No more worry about multiple parts you must purchase.
