Description of 4 Day Course

Enjoy personalized 1 on 1 training with no dental implant experience needed! You will learn how to use the tools of a basic implant kit. You will learn to evaluate a surgical implant and prosthetic kit based on ease of use and the economics to incorporate those kits into your practice. You will learn to treat four different types of implant scenarios. You will learn and get experience in placing dental implants on live patients. You will learn and get experience with bone grafting techniques on live patients. AGD subject code will be issued upon course approval.

“Recommend to any dentist looking to learn about implant placement. Length of course is perfect and there was enough information on the first day for me to feel comfortable placing implants the second day. I placed 11 implants over the weekend!” - Dr. Sarah Johnston, Dentist
