Best Active Stereo Music System
KEF
LSX

KEF LSX

TAKING DESIGN AND tech cues from the ground-breaking LS50 Wireless active loudspeaker, the LSX is smaller, simpler and more affordable. Powered by a Class D amp, it delivers 100W to each Uni-Q driver. Physical inputs include Toslink optical and a 3.5mm mini-jack. AptX Bluetooth, AirPlay 2, Spotify Connect and Tidal wireless are built in, and direct streaming from a NAS drive or computer via DLNA supports files up to 192kHz/24-bit. A control app allows you to tweak the sound according to placement and taste, allowing you to craft a pitch-perfect, tonally smooth and thoroughly seductive musical performance.
