

EXECUTIVE SUMMARY

Golf is a major sport around the world with 85% of the world supporting the sport with a \$82 billion market size. Contrary to its success with targeting the leisure elites in country clubs the present and future of the great sport demand a shift to a more lighter, faster and a social entertainment atmosphere. **An accessible and interactive golf with a social friendly entertainment content suitable for our daily routine is the future of the traditional sport.**

SmartGolf GIT resolves this problems. Modern Golf entertainment integrating virtual golf with socializing contents powered by a de-centralized network of user generated swing data, SmartGolf will revolutionize the way we play, practice even think of golf.

1. SmartGolf Plaza – a marketplace for a new golf entertainment

Swing and play on the virtual SmartGolf courses either with your friends or an online player. Obtain GIT points for game participation and prize tokens which can be used as currency for food & beverages, music and other commodities all inside the SmartGolf plaza. Spectators can choose to place GIT coins on players in return for rewards as gallery.

2. SmartGolf Network – decentralized network or swing data tokens

Every swing from a golfer is tokenized and saved into SmartGolf wallets. Connect with fellow golfers and either purchase an wanted swing token from an advanced golfer or sell your superior swing to a golfer in need of help. Upload the swing token to the DB and receive adequate training & equipment for the according token classification.
