

## Universal Speakers Installation Instructions

1. Decide where you want to mount the speakers and line up the metal mounting brackets with your rack.
2. Put the hose clamps through the metal mounting brackets, put 4 screws in with washers between the mounting brackets and speaker housings.
3. Screw in one of the mounting brackets, do not fully tighten.
4. Test fit the housing and make sure the hose clamp is in the correct position so you can get a screwdriver to it when you are tightening it.
5. Install the other hose clamp and mounting bracket, again with washers between the mounting bracket and the speaker housing.
6. Test fit it again, then tighten the mounting bracket screws.
7. Put the rubber between the hose clamps and your rack, mount the speakers, tighten the hose clamps.
8. Repeat this for both speakers
9. Run the gray wire between the speakers and plug it in.
10. Run the black and red wire back to your battery, connect it to your battery.
11. Use cable ties to secure all loose wires.
12. Turn on the toggle switch, connect your phone Bluetooth to "Knight ATV Speaker"
13. Done! Go Riding!
