12 cm

INSTRUCTIONS

1. Print this sheet (at 100% scale - do not "Fit to Page") and ensure proper scale by measuring the scale bar to the left.

2. Fold along the bottom dotted line and place against the wall.

3. Place heel against the wall and mark the end of the toes on the sheet. Measure both feet as one may be longer than the other.

4. Leave a minimum of $\frac{3}{8}$ inch (1 cm) growing room and no more than $\frac{3}{4}$ inch (1.9 cm).

IMPORTANT
The lines above show the actual length of the inside of the shoe, so be sure to leave growing/wiggle room.

FOLD ON DOTTED LINE
