NEW DO-IT-YOURSELF POLISHER DELIVERS PROFESSIONAL SHINE

Now owners can detail their own boats like a professional in half the time and with half the effort. Shurhold Industries introduces its revolutionary Dual Action Polisher, giving users a more efficient and cost-effective way to polish their vessel. The Innovation Award-winning polisher will be available for sale starting January 1, 2010.

Featuring a unique random action orbit for brilliant shine, this polisher's pad oscillates and rotates on varying orbits to prevent swirl and burn marks. Specifically-designed for use on boats, Shurhold's Dual Action Polisher has an extra long 6m power cord.

An adjustable soft-touch, D-handle creates ideal hand positioning, while the soft-touch head provides comfort. At only 2.2kg, this polisher is a breeze to maneuver. Operating with a 2500-6500 OPM motor, it has six speed settings.

A wool compounding pad is available to remove oxidation and a pro polish pad is offered for applying wax. Shurhold also manufactures a microfiber bonnet to remove haze after polishing.

Extremely versatile, it's great for polishing fiberglass, gelcoat, stainless steel and metalwork. It can even be used to clean windshields when using the appropriate pad and cleaner. After owners finish shining up their boats, they can take the polisher to their car or caravan.
