NEW DUAL ACTION POLISHER IS MORE POWERFUL

With more power, bigger pads and a larger orbit, Shurhold Industries introduces the Dual Action Polisher Pro. It works using a similar motion as its predecessor, but can cut through oxidation faster with its greater pad and orbit size.

The Pro features an industry-leading, extra-large 21 mm random orbit, so users get a swirl-free shine every time. The machine is well-balanced and powerful enough for an expert detailer, but easy enough for the novice to use.

It has a 900 watt motor and weighs only 6 lbs. This lets owners work faster and more efficiently than ever before. The Pro features a 6" Quick Change Backing Plate, two ergonomic gripping styles and EZ Change carbon brush ports. The variable speed dial is easily controlled by a thumb. A locking button enables users to keep a steady pace without accidentally turning it off.

An entirely new pad system was created to compliment the Pro. It includes larger pads with a tougher Velcro backing.

Shurhold's Dual Action Polisher Pro has a price of \$315. It comes with a detailed user guide and canvas storage bag.

Dedicated to educating boat owners, Shurhold provides key tips for boat value preservation at www.shurhold.com. Inventor of the One Handle Does It All system, Shurhold manufactures specialty care items and accessories to clean, polish and detail.
