POLISHER PAD DUO LEAVES A SHINY FINISH

Surface scratches and oxidation can be easily removed with Shurhold Industries' Dual Action Polisher. But, the best way to get back showroom shine is to use the polisher with Shurhold's Pro Polish Pad and Brite Bonnet. Together, they remove oxidation and surface scratches, while delivering a shiny surface.

With pads specialized for specific applications, the Pro Polish Pad is a black foam polishing and waxing pad. Measuring 6-1/2" in diameter, its unique dimpled pattern helps the pad stay cool and work more efficiently. Designed to leave behind a smooth finish, it's ideal for finessing and works best when used with Shurhold's Pro Polish. This pad should be washed after each use with soap and lukewarm water.

The Brite Bonnet is a shaggy microfiber pad used to remove excess wax and buff the surface to a final shine. This unique pad is designed with a vapor barrier inside so it may be fitted over a wet wax pad for quick use. Users just stretch the pad and fit it over Shurhold's Pro Polish Pad. For cleaning, it can be hand washed and air dried.

Shurhold's Pro Polish Pad costs \$23.98 for a two-pack, while the Brite Bonnet is \$11.98. Both the Dual Action Polisher and Pro Polish are sold separately.
