PRO POLISH MAKES GREAT RV SUNBLOCK

Just like their owners, RVs need UV protection from the harsh rays of the sun. With Shurhold Industries' Pro Polish, owners help prevent fading by applying this SPF to their RV. It contains UV inhibitors.

Pro Polish is scientifically formulated to protect an RV from UV rays and environmental fallout. It repels water and provides a deep, high-gloss shine. It's great for fiberglass, gelcoat, clear coat and aluminum.

Better than an old fashioned wax, Pro Polish is a polymer-based formula with cosmetic-grade ingredients. It contains no fillers or talc. Pro Polish goes on quick and easy.

When buffing out Pro Polish there will be no major mass of white powder as the product is worked off. This white powder is talc and is used as a filler. Pro Polish will produce virtually no waste, since it contains no fillers. Owners can now apply and buff out the product in less time and with less effort.

Shurhold's Pro Polish costs \$22.98.

Shurhold is dedicated to educating owners on RV value preservation. Inventor of the One Handle Does It All system, Shurhold manufactures specialty care items and accessories to clean, polish and detail.
