The Koda™ Outdoor LED Coach Light is an immediate upgrade to your home's exterior. Featuring a cast aluminum body, bright 800 lumens energy-efficient LED bulb and 3000K warm light color, this traditional outdoor coach light will brighten any home with style.

The built-in Dusk-to-Dawn feature using photo sensing technology enables the Koda Outdoor LED Coach Light to automatically turn on and off the light as darkness and daylight are sensed, saving you from needing a timer or flipping a switch.

If you prefer a more traditional light bulb, no problem. The Koda Outdoor LED Coach Light comes with a 9 watt LED bulb, but is also compatible with a 60 watt incandescent bulb.

Whether you're looking to replace an existing coach light or need extra lighting around the home, try the Koda Outdoor LED Coach Light and experience an outdoor light with style and brightness.

Important Safety Instructions:

Please read the following safety information before use. To reduce risk of fire, electric shock, or injury to persons:

- This light fixture is intended to be installed utilizing a NEC compliant junction box.
- Turn OFF the main power at the fuse or circuit breaker before installing the light fixture or making any electrical connection.
- Make sure this light fixture is adequately grounded. To ensure proper grounding, there must be a separate ground wire (bare copper) contact between this light fixture and the ground connection of your main power supply panel. Do not connect the bare or green insulation fixture ground wire to the black (hot) current-carrying wire or the white (neutral) wire. Connection of the bare or green fixture ground wire to the black or white wires may cause metal parts of the fixture to carry electrical currents, and may cause electrical shock, which could cause serious injury or death.
- Do not connect this fixture to an electrical system that does not provide a means for equipment grounding. Never use a fixture in a two-wire system that is not grounded. Installing a fixture into an electrical system not having a proper grounding could cause metal parts of the fixture to carry electrical currents if any of the fixture wires, wire connections, or splices were to become broken, cut, or loose during the mounting or normal operation of the fixture. Under this condition, anyone coming in contact with the fixture would be subject to electrical shock, which could cause serious injury or death.
- CAUTION: A loose wire increases the risk of fire; tighten all connections securely.
- Do not suspend any fixture by the house wires. Suspending a fixture by the house wires and wire connectors may result in the fixture falling, possibly causing personal injury and the danger of electrical shock or fire.
- It is recommended that a qualified electrician perform all wiring connections. All electrical connections must be in accordance with all national and local electrical codes.

- This light fixture is designed for use in a 110 – 120VAC, 60Hz fuse circuit. Not for use on a dimming circuit.
- For outdoor use.

Warning:

- Failure to disconnect the power supply prior to installation may result in serious injury or death.
- The warnings, precautions, and instructions discussed in this manual cannot cover all possible conditions and situations that may occur. The operator must understand that common sense and caution are factors which cannot be built into this product, but must be supplied by the operator.

PACKAGE CONTAINS:

Please lay out all parts and read the instructions prior to installation.

BEFORE INSTALLATION:

- Carefully remove the coach light fixture, LED bulb and mounting accessories from the box, and check that all parts are included. Do not attempt to assemble the product if any part(s) is missing or damaged. Please contact Koda customer support if this is the case.
- The outlet box described in this manual is not provided. A standard outlet box needs to be pre-installed in the exterior wall, and the power supply wires running to the outlet box need to be rated 120VAC. If an outlet box does not exist, contact a qualified electrician for installation.
- Turn OFF the main power at the fuse or circuit breaker before installing the light fixture or making any electrical connection. You may use a non-contact voltage tester to ensure no power is running to the wires.

Warning: Failure to disconnect the power supply prior to installation may result in serious injury or death.
Never connect the ground wire to the hot or neutral power supply wires.

INSTALLATION:

INSTALLATION PROCEDURE:

1. Unscrew the lock nuts from the mounting bracket.
2. Pull the power supply wires out from the outlet box, and install the mounting bracket to the outlet box using the bracket mounting screws.

3. Make the following spliced wire connections using wire nuts:
Black (hot) wire to the hot supply wire (most likely black or colored).
White (neutral) wire to the neutral supply wire (most likely white).

Bare copper (ground) wire to the supply ground wire (most likely bare copper, green wire, or green and yellow wire), or wrap around the ground screw if ground wire does not exist.

Screw the wire nuts in a clockwise direction until tight. Make sure no bare wire or wire strands are visible after making the connections. Check for tightness by pulling wires.

Consult with a qualified electrician if you have any electrical questions or if your current power supply does not include a ground wire.

4. Place the canopy over the outlet box and feed the fixture mounting screws through the canopy openings. Adjust the fixture mounting screws until they protrude out from the canopy roughly 1/4 of an inch.

5. Remove the canopy and secure the position of fixture mounting screws by tightening the hex nuts. Carefully place all the wires and wire connections into the outlet box.

6. Place the canopy over the outlet box with fixture mounting screws feeding through the openings. Install the rubber washers first, then install the canopy mounting nuts.

7. After installing the fixture, caulk the upper 3/4 of canopy to the mounting surface with silicone sealant (not included). Leave the bottom 1/4 un-caulked to allow drainage of any water that might leak into the enclosure.

8. Install the light bulb.

9. Install bottom cap knob onto the bottom cap, and secure the cap to the fixture with bottom cap screws.

REPLACING LED OR INCANDESCENT BULBS

1. Open the coach light fixture body by unscrewing the mounting nuts and rubber washers.

Take the existing light bulb and replace with a new one. Only replace light bulb with E26 base, 120 V, 60 W maximum.

2. Reattach the lower part of the light fixture, and install the rubber washers and mounting nuts.

PRODUCT SPECIFICATIONS:

Operating Voltage: 120 Vac, 60 Hz
Compatible with an incandescent light bulb of 120 V, 60 W MAX, E26 base
LED Bulb (included): 800 lumen, 3000K, 9 W (not to use with dimmer)

TROUBLESHOOTING:

Problem	Possible Cause	Solution
The light does not come on.	The light wall switch is turned off.	Turn the light wall switch on.
	The fuse is blown or the circuit breaker is turned off.	Replace the fuse or ensure the circuit breaker is turned on.
	Faulty wire connection.	Check all wiring to ensure they are correctly and securely wired.

Important Safety Instructions:

Warranty:
Koda
This Koda product carries a 3-year warranty against defects in workmanship and materials. This product is not guaranteed against wear or breakage due to misuse and/or abuse.
NOTE: Warranty only applies for North American customers of purchases made in North America.

Conditions of Warranty

If during the 3-year warranty period your new product is found to be defective, Koda will repair such defect, or replace the product, without charge for parts or labor subject to the following conditions:

- All repairs must be performed by Koda.
- All warranty claims must be accompanied by a copy of the sales receipt or bill of sale.
- The equipment must not have been altered or damaged through negligence, accident, improper operation, or failure to follow the product instructions for installation, use, or care.
- The replacement of parts is excluded from the warranty when replacement is necessary due to normal wear and tear.
- Repair or replacement parts supplied by Koda under this warranty are protected only for the unexpired portion of the original warranty.
- This is a “repair or replace” warranty only, and does not cover the costs incurred for the installation, removal or re-installation of the product.

OWNER’S RESPONSIBILITIES: Koda will make every effort to provide warranty service within a reasonable period of time. SHOULD YOU HAVE ANY QUESTIONS ABOUT SERVICE RECEIVED OR IF YOU WOULD LIKE ASSISTANCE IN OBTAINING SERVICE, PLEASE CALL TOLL FREE 1.866.294.9244 DURING REGULAR BUSINESS HOURS MONDAY THROUGH FRIDAY 8:00 AM TO 5:00 PM PST.

NOTE: Toll Free # is for North America Customers ONLY. See Customer service section for customer contact numbers for other regions/offices.
For customer service and technical support, please call us at 1.866.294.9244 or email us at info@kodabuilt.com. If at that time it is determined that a replacement unit is needed, the support representative will issue a Return Authorization and instruct on how to get a new unit. Koda makes no other warranty of any kind aside from the limited express warranty stated herein.

DISCLAIMER OF WARRANTIES, INCLUDING WARRANTY OF MERCHANTABILITY AND WARRANTY OF FITNESS FOR PARTICULAR PURPOSE: EXCEPT AS SPECIFICALLY SET FORTH HEREIN, NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, IS MADE AS TO THE KODA OUTDOOR LED COACH LIGHT. KODA AND/OR ITS AFFILIATES EXPRESSLY DISCLAIMS, WITHOUT LIMITATION, ANY STATUTORY WARRANTIES AND ALL IMPLIED WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.
