Dr. Layne Norton's References

1. Fructose does not increase TAGs <https://pubmed.ncbi.nlm.nih.gov/433820/>
2. Long term high fructose intake does not increase uric acid in humans at 50-60g added per day for 12 weeks to 1 year:
 - <https://pubmed.ncbi.nlm.nih.gov/3618627/>
 - <https://pubmed.ncbi.nlm.nih.gov/2527132/>
 - <https://pubmed.ncbi.nlm.nih.gov/2721342/>
3. When exchanged in a 1:1 ratio with other sugars fructose & HFCS have no effect on:
 - Cardiometabolic markers: <https://pubmed.ncbi.nlm.nih.gov/33029629/>
 - Insulin sensitivity: <https://pubmed.ncbi.nlm.nih.gov/28592603/>
 - No effect on body weight: <https://pubmed.ncbi.nlm.nih.gov/22351714/>
 - Does not induce NAFLD: <https://pubmed.ncbi.nlm.nih.gov/24569542/>
 - Does not effect lipids: <https://pubmed.ncbi.nlm.nih.gov/26358358/>
4. Supplementing with 150g fructose per day had no effect on body weight or any markers of health: <https://pubmed.ncbi.nlm.nih.gov/31796953/>
5. Fructose has no different effect on satiety than milk:
<https://pubmed.ncbi.nlm.nih.gov/18065574/>
6. Fructose pre-load decreases subsequent food intake by 500 kcal more than glucose preload:
 - <https://pubmed.ncbi.nlm.nih.gov/3592650/>
 - <https://pubmed.ncbi.nlm.nih.gov/2178391/>
7. Consuming HFCS or sucrose in a hypocaloric diet causes weight loss regardless of level of fructose or sucrose: <https://pubmed.ncbi.nlm.nih.gov/22866961/>
8. IF it's fructose, how could the higher fructose diet lose more body weight?
<https://pubmed.ncbi.nlm.nih.gov/21621801/>
9. Overfeeding with fructose, glucose, sucrose, or fat equally affect fat balance:
<https://pubmed.ncbi.nlm.nih.gov/10919929/>
10. Salt reduction does not increase body fat loss:
<https://pubmed.ncbi.nlm.nih.gov/29492213/>
11. White rice diet causes massive weight loss:
<https://pubmed.ncbi.nlm.nih.gov/1200726/>
