RING SIZE GUIDE

PAPER SIZE SCALE

PLEASE READ CAREFULLY

Deselect any "scale to fit" checkboxes when printing. Before proceeding, measure the above bars to check that they are exactly 2 inches or 50mm. This will ensure that you get an accurate ring size measurement.

INSTRUCTIONS & OTHER HELPFUL HINTS

- First, use a ruler to measure the paper size scale at the left to check that this guide is printed correctly
- Dry your hands and make sure they are not excessively hot or cold.
- The end of the day is a good time to measure yourself since you will be at your largest size.
- If you plan on ordering a band that is wider than 5mm, you should size up 1/4 or 1/2 size (for example, if this guide measures you at size "8", order size "8.25" or "8.5")
- For a surprise sizing, take an existing ring that your partner wears on his or her ring finger and press it into a bar of soap. Measure the indentation (of the *inside* edge of the ring) against our guide to determine your partner's size

METHOD 1: MEASURE AN EXISTING RING

1. Find a ring that fits snugly on the finger you plan on ordering a ring for. There is usually a quarter or half size difference between the right and left hand. In the United States, an engagement ring or wedding band is worn on the ring finger of the left hand.
2. Place the ring over the circles below until you find the best match against the inside edge of the ring. The best match is the one where the edge of the circle perfectly matches the inner edge of the ring. We also offer quarter sizes for those who are in between 2 sizes.

METHOD 2: MAKE YOUR OWN RING SIZER

1. Cut out the sizer below along the edges. Then, cut a slit in the marked bar as shown.
2. Wrap the sizer around the part of the finger you want to size, making sure that the numbers are visible to you.
3. With the sizer still around your finger, insert the pointed end of the sizer through the slit you cut in Step #1 and pull until it is tight around your finger.
4. Making sure that the sizer is tight around your finger, look for the number that lines up with the slit. This is your size. Remember that we offer half and quarter sizes as well, so make note of the closest increment available.
