# *TOOLS NEEDED*

**1** Place the foam gasket onto mounting surface and mark the four holes to drill.
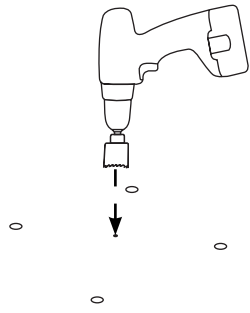

**2** Using a drill bit drill the four holes for the mounting bolts.

**3** Using a hole saw, drill the center hole for the cable.

**4** Insert the four nuts into the adapter plate as shown. *(This may have already been done for you).*
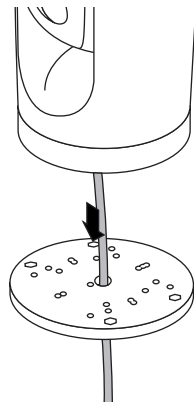

**5** For the SLADAPT3 adapter plate you will need to drill a hole in the center for the cable.
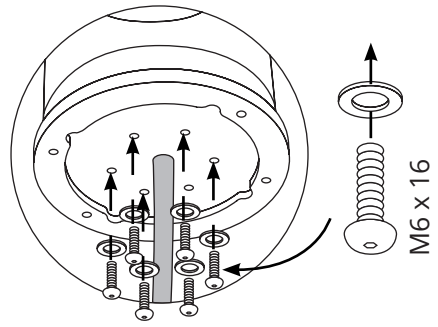

**6** Route the electronics cables through the hole you just drilled into the SLADAPT3.
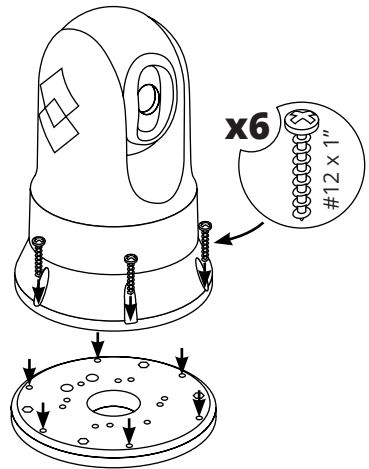

**7A** Insert the six M6x16 bolts and washers through the bottom of the SLADAPT3 and into the camera.
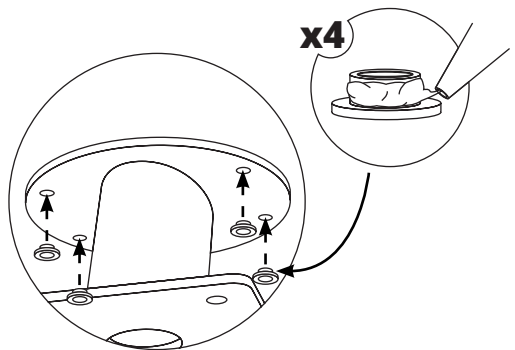

M6 x 16

**7B** Using a philips head screwdriver screw in the six #12x1" screws to secure the camera to the adapter plate.
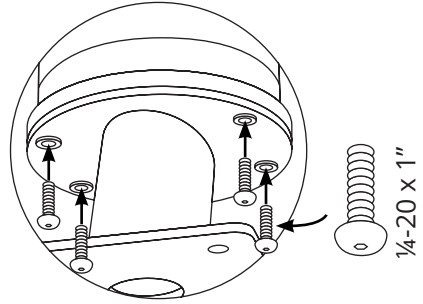

x6

#12 x 1"

**8** Apply marine adhesive sealant to the four nylon shoulder washers and then insert into the top plate of the Seaview mount.
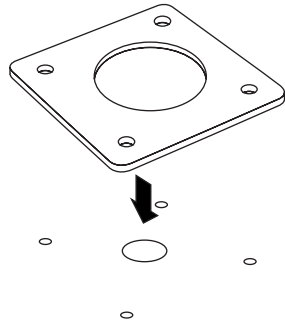

x4

**9** Route the electronics cables through the center hole on the top of the mount.

**10** Secure the adapter plate to the mount with the four ¼-20x1" bolts.
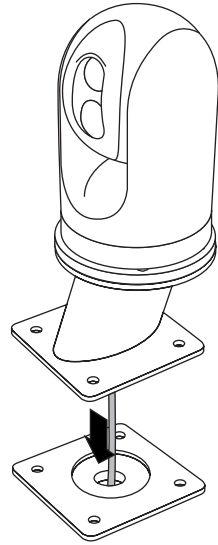

¼-20 x 1"

**11** Place the foam gasket over the bolt holes you drilled in Step #2.

**12** Route the cabling through the center hole. Place the mount assembly ontop of the foam gasket.

**13** Apply marine adhesive sealant onto the four nylon shoulder washers. Then insert the washers into the four bolt holes on the base of the Seaview mount.
