NEW!

ODORMED[®]

NOT A MASK. NOT AN ENZYME.

Background

Unpleasant animal-related odors are a common, daily occurrence, and managing them safely and effectively is an important part of keeping your work environment pleasant, your clients satisfied, and pets happy.

Uses

Feces, urine, and emesis are just a few of the common odors present in the Animal Zone of the clinic (kennel, grooming, dog & cat ward) and managing them effectively is key to sending your patients home in optimal condition. In the Staff Zone (laundry, laboratory, conference room, pack/scrub & treatment area) use ODORMED to make your daily work environment the best it can be. And finally, keep client retention high and bad perceptions low by effectively addressing odors in the Consumer Zone (lobby & waiting area, bathroom, retail & exam room).

Directions for Use

Professional strength, all-purpose ODORMED permanently eliminates animal-related odors in the clinic.

For quick, permanent results spray directly on the source of the odor. Funnel included for spray bottle refill. Use enough product to completely cover and saturate the odor area. For hard surfaces spray directly on the source of the odor and wipe or let air dry. For fabric or carpet, soak the area to allow ODORMED to reach the odor source. Let air dry. On stains, soak the area and rub thoroughly with a sponge or a clean cloth and let air dry.

The product must come in contact with the source of the odor to be effective. If odor persists after ODORMED has dried, the source of the odor has not been reached. Continue to reapply as necessary.

May be applied directly on cages, fabric, carpet, floors, walls or any place an odor problem exists.

Product Safety

All Thornell products are safe for use on any surface or directly on the animal. As with any pet care product, consult with your veterinarian and review and follow the label directions. Contains water, proprietary essential oil blend and preservatives.

Keep out of the reach of children. For external use only.

Cautions

Spot test for color fastness before applying to any fabric. Do not spray directly into animals eyes.
