Fast Jet Equipment

The CSU-13B/P is an Anti-G suit worn by fighter aircraft pilots to counteract positive head-to-foot G-force. The Anti-G suit is a wraparound garment with an internal inflatable bladder that compresses the waist and legs of the wearer during G induced flying maneuvers.

Features and Specifications

Bladders located at abdomen, thigh and calf area.
Waist and leg entrance zipper fasteners.
Cord lacing fit adjustment with lacing covers.
Detachable leg pockets.
Leather reinforced shin and shroud knife pockets.
