# Survival Kits

The Crew Survival System is a two-person, 48 hour, modular survival ruck designed to replace heavier legacy aircrew survival kits. Weighing only 23 pounds, the system contains three modules: sustainment (LIRSH), medical, and survival. The contents have been thoroughly reviewed and independently tested by the 160th US Army Special Operations Aviation Regiment (SOAR).

## Features and Specifications

Stowable shoulder straps to reduce snag hazards.  
 Carabiner attachment points for connection to aircraft.  
 Expandable 8" compartment increases bag volume.  
 Quick access "dump pouch" for E&E situations.  
 Module 1 (sustainment): two-year shelf life.  
 Module 2 & 3: unlimited shelf life.  
 HAZMAT: UN 3316, First Aid Kit, Class 9,  
 IATA Y960, NSN: N/A

Dimensions ..... 12.75" x 9" x 19"  
 Expanded Dimensions ..... 12.75" x 9" x 27"  
 Expanded Volume ..... 3,100 cubic inches  
 Weight..... 23 pounds  
 Complete System Part #..... SUR-8000-00  
 Module 1 (LIRSH) Part #..... SUR-8000-01  
 Module 2 (Medical) Part #..... SUR-8000-02  
 Module 3 (Survival) Part #..... SUR-8000-03

### Sustainment Module

Bagged Water (16)  
 Electrolite Tabs (1 tube)  
 Rations, 2,400 cal. (4)  
 Purifying Drinking Straw (1)
