Survivor Light

The LNK-AL15 is an FAA approved water-activated LED survivor locator light approved for use on life vests or life preservers to indicate the location of survivors in the water. The lamp and lens combination used in the LNK-AL15 produce a powerful light that will last for a minimum of 8 hours after activation. Throughout its operational life, the light will continuously output a steady white light to clearly indicate a survivor's location and increase the probability of rescue.

Features and Specifications

Water-activated	Battery Body Size.....2.55" x 0.82" x 0.36".
High-efficiency LED bulb	Lamp Size1.5" diameter x 1.06"H
Simple life jacket integration	Weight.....0.99 - 1.11 oz.
Three wire lengths: 9", 18", 24"	Activation.....Automatic (Water-activation)
Small, lightweight design	Luminosity.....1 cd +
Exceeds 8 hours operational life	MaterialHigh-impact Styrene
TSO-C85b certification	Operating Temperature35.6°F - 86°F

HAZMAT: N/A NSN: N/A

LSI Part Numbers

- SIG-1503-09.....9 inch wire length
- SIG-1503-18.....18 inch wire length
- SIG-1503-24.....24 inch wire length
