

Delphi Apex 2.8 6 Pin bulkhead connector pin-out.

These connectors are found on several FPG products and are relatively easy to use. You will need to make sure that you follow the pin order indicated below to prevent any malfunctions.

For crimping instructions, please refer to the manufacturer's manual.

Note: The red secondary lock needs to be removed for the underside connector. We also recommend removing the seals inside the tank as they could react with certain fuel types and blends.
