

FPG Hat with integrated Deutsch Connectors Wiring Guide for R32GT-R In-Tank Surge Tank “TE” Track Edition:

4 Pin Large Deutsch Connector (**DTP4**): Used to power pumps

Pin 1: Lift Pump Positive
Pin 2: Lift Pump Negative
Pin 3: Main Pump 1 Positive
Pin 4: Main Pump 2 Positive

3 Pin Small Deutsch Connector (**DTM3**): Used for fuel level sender

Pin 1: Red
Pin 2: Black
Pin 3: Grey

You will need to replicate the factory wiring order, identify and make a note of which wire goes where and connect in the same order. A matching Nissan connector for a “plug and play” install can also be purchased on the FPG website in the “wiring and connectors” section.

The FPG fuel level sender only has two wires and does have a low level light.
