

ITALPOLLINA
HELLO NATURE!

SoilAID™ 2-0-0

SoilAID 2-0-0 is a soil surfactant enhanced with a liquid Vegetal Peptide fertilizer.

The surfactant in **SoilAID 2-0-0** reduces the surface tension of water and may improve water-repellent conditions in soil to help improve uniform distribution of water to the rootzone. The Vegetal Peptide fertilizer incorporated into **SoilAID 2-0-0** enhances traditional fertilizer programs, and it has been formulated for rapid absorption by crops to improve nutrient uptake.

USE INFORMATION AND DOSE

SoilAID 2-0-0 is safe to apply near water and livestock and may be applied to young plants. The general recommended use rate is 4 to 16 fl. oz. per acre. It should be mixed with water. The amount of water recommended is dependent upon the type of equipment being used to apply the mix and the desired results.

SoilAID 2-0-0 can be applied via injection through irrigation systems at a rate of 8 to 16 fl. oz. per acre during early growth stages. Apply 1 to 2 fl. oz. per acre during subsequent irrigation as needed. It may be applied at any time of the growing season.

COMPATIBILITY AND MIXING

SoilAID 2-0-0 is believed to be compatible with most herbicides, fertilizers and pesticides. However a jar test is recommended before tank mixing and application, especially when using multiple chemicals. Do not use **SoilAID 2-0-0** with chemicals that prohibit the use of surfactants. To reduce the foaming during mixing, add **SoilAID 2-0-0** to tank mix after all water and/or other chemicals have been mixed. The use of a defoaming agent is also recommended.

SHAKE WELL BEFORE USE

Due to the biological nature of this product, separation and color variations are normal.

This product is stable at ordinary temperatures and pressures. Store in a dry place at temperatures between 40° and 95° F. Keep out of reach of children and animals. Do not eat. Avoid contact with eyes and skin. In case of accidental spillage of fertilizer, collect with absorbent material.
