

SMART-PAK SERIES

**NEW
PRODUCT**

REPLACEABLE CARTRIDGES EQUIPPED WITH ENCRYPTED "SMART TECHNOLOGY"

The Smart-Pak offers an EPA compliant installation for compressed air systems. The small footprint design and lightweight system combine for a perfect solution to mezzanine installations and crowded compressor rooms.

The new sleek design of the cabinet, partnered with "smart" technology in the cartridge systems, offers a mess free installation, guaranteed performance and provides aftermarket security.

Our new encrypted "Smart Technology" is an electronic signature between the cabinet and cartridge, eliminating non-authorized parts from being used.

DESIGN**

IDC SERIES INTERNAL DECOMPRESSION CHAMBER

THE MOST EFFECTIVE ACTIVE MOLECULAR FILTRATION

- No maintenance required
- Internal decompression chamber
- No mess
- Best value oil/water separator in the market
- Industrial design
- Efficiently & effectively removes all oils, including glycol based lubricants
- Cradle to grave warranty
- System monitoring for timely change out
- No exposure to mold, bacteria or e-coli
- No messy bag change outs

GUARANTEED PERFORMANCE

Clean Resources guarantees properly sized and installed products will reduce the contaminants in your compressor condensate to less than 10 ppm for the life of the unit. If your unit fails while operating in approved conditions and has been properly sized and installed, we will replace the failed CRP Pak on a pro-rated schedule.

SUPER PAK

The Super Pak by Clean Resources offers large compressed air systems a strong, reliable oil/water separator. Standard systems are designed for 4,000-10,000 CFM applications.

LARGE COMPRESSED AIR SYSTEMS SUPER PAK BENEFITS

- Small footprint for large HP systems shipping on a 48" X 48" pallet
- Ships from factory pre-plumbed, primed and leak tested
- 3 layers of redundancy
- System capacity functions on all compressor lubricants, including glycol lubricants
- Custom decompression chamber
- No messy bag change outs
- Ships on super duty pallet
- No exposure to mold, bacteria or e-coli
- No maintenance required
- System monitoring for timely change out

PRODUCT**

MICRO 50 & MICRO 100 MICRO AND MICRO PLUS

DESIGNED FOR SMALLER COMPRESSED AIR SYSTEMS

This system was designed as an economical solution for small compressed air systems. As part of the system, we have included an external decompression chamber allowing systems up to 175 psi.

The product offerings also include a factory installed and plumbed wall bracket, reducing installation time.

Replacement cartridges provide easy, no mess maintenance and offer the lowest life cycle cost in the industry.

SMART GREEN END OF LIFE SOLUTIONS

We're committed to reducing our carbon footprint and want to make it easy for you to do the same. Our Smart Green recycling program offers free end of life recycling for saturated CRP Paks, in hopes to prevent them from ending up in landfills like many competitive oil/water separators. Clean Resources will even cover the cost of the recycle processing fees for end users that use our Green End of Life Solution. You can learn more at recycleoilsep.com
