Compressed Air Dryer
Secador de Aire Comprimido

COMPRESSED AIR DRYER

Secador de Aire Comprimido

The ADS Schulz line of air dryers was designed to facilitate inspection and maintenance operations. The panels are easily removable and allow immediate access to internal components. ADS Schulz dryers are equipped with a quick-disconnected automatic drain valve which does not require any special tools for maintenance and cleaning.

Performance

ADS Schulz dryers have excellent performance, even in situations where ambient and inlet temperatures are elevated.

Economy

ADS Schulz dryers are designed to match the displacement of the air compressors, consequently, it is not necessary to oversize the dryer, resulting in savings in energy consumption.

Funcionality

The dryer's operation is monitored by an electronic controller which digitally indicates the temperature and dew point, controls the drain valve through a timer, and the condenser fan through a probe. The refrigerant is circulated through the system using high-efficiency compressors. These compressors have totally new design that brings low levels of power consumption and high dependability.

Correction factor for inlet air temperature changes / Factor de corrección según la variación de la temperatura aire en entrada									
Air temperature/ Temperatura aire	°F	≤90	100	110	122	130			
	°C	≤32	38	43	50	55			
Factor (F3)		1.11	1.00	0.80	0.65	0.53			
Correction factor for DewPoint changes / Factor de corrección según la variación del punto de rocío (DewPoint)									
DewPoint/ Punto de rocío	°F	38	41	45		50			
	°C	3	5	7		10			
Factor (F4)		0.92	1.00	1.7		1.25			

These specifications are measured at the following conditions: Ambient temperature 38°C (100°F), Air inlet pressure at 7barg (100psig) and 38°C (100°F), and dew point at 5°C (41°F). Maximum operating conditions: Ambient temperature 45°C (113°F), air inlet temperature 55°C (131°F), and inlet pressure 14barg (203psig).

Los datos que se indican hacen referencia a las siguientes condiciones nominales: Temperatura ambiente 38°C (100°F), con aire en entrada a 7barg (100psig) y 38°C (100°F) y un punto de rocío a presión de 5°C (41°F). Máxima condiciones de funcionamiento: Temperatura ambiente de 45°C (113°F), temperatura entrada aire 55°C (131°F) y presión entrada aire 14barg (203psig).

COMPRESSORS

Company History

With more than 51 years in the market, Schulz is constantly improving. Using state of the art technology to achieve the competitiveness requested by the market. In the beginning, Schulz concentrated its activities on the foundry segment, and in 1972, Schulz began manufacturing air compressors.

What began as a line of only two air compressor models would soon turn into the largest and most complete line produced in Brazil. In 1984, Schulz products were made available through all of Latin America, Central America, and the USA.

Following this strategic development, in 1989 Schulz began the production of rotary screw compressors, competing in this segment with the biggest worldwide companies. In 1999, Schulz of America, Inc. was founded in Atlanta, Georgia with a warehouse, sales, and technical personnel who were trained at the head office in Joinville, Brazil. By doing this, Schulz definitively conquered it's share in the North American Market.

Currently, the company possesses modern industrial facilities with more than 667,000 ft² of built up area where it develops diaphragm, reciprocating, and rotary screw compressors. Schulz continuously improves, perfecting production and testing processes and investing in staff development. Approved by the most demanding and rigorous international quality certification authorities, it is conquering important markets.

Today, Schulz is present in more than 60 countries, which reaffirms the excellence and the high technological standards of the product lines.
