

## Installation of Micro

**Check for damage that may have occurred during shipping**

**DO NOT OVER TIGHTEN FITTINGS, AVOID DAMAGE TO COUPLINGS**

1. Mount the MICRO mounting bracket on a wall or secure surface. Make sure it is secure.
2. Remove the yellow plastic plug from the cartridge. 
3. Insert cartridge into the MICRO mount. Hand tighten cartridge counter-clockwise. Label should be facing you when fully in place.
4. Connect condensate lines to decompression chamber using 1/4" polyethylene tubing. Condensate flows out through the cartridge.
5. Install a 1/4" polyethylene tubing into the outlet of the MICRO. Ensure that there are no kinks.
6. Check for leaks

**Replacement Filters: F10106**

**Installation Kit: F10101**

### ATTENTION

Monitor water being discharged from unit. When water turns cloudy or maximum lifespan is reached, replace unit!

### WARNING

**MAX 175PSI**

\*Decompression chamber must be used.  
MAX 125PSI without decompression chamber
