

## trueCLEAN MTP/MPO Click Cleaner

Versatile • Compliant • Certified by trueFIBER

### Key Features

- Quick change dust cap
- Easy-to-use on data center and high density optical networks
- Visible indicator of remaining cleaning tape
- One click MTP cleaner

**Have you cleaned your end face today? trueCLEAN can improve your optical performance and even help prevent equipment damage!**

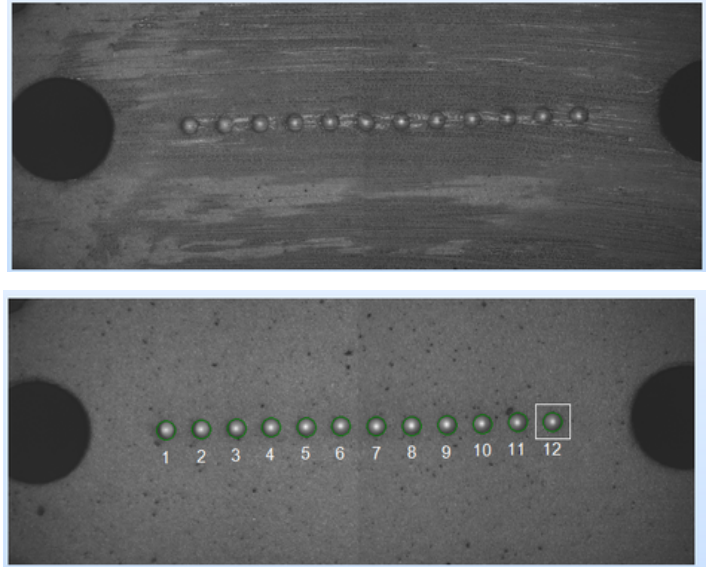

### Detailed Specifications

#### trueCLEAN MTP/MPO

Connector Form Factor	MTP/MPO - 8/12/24 Fiber
Connector Type Compatibility	Bulkhead/Coupler/Male/Female Connector
End Polish Compatibility	PC/UPC or APC
Tool Construction	Anti-static ABS
Cleaning Method	Click advance dry tape
Target Contaminants	Dust/Oil/Moisture
Applications	Easy-to-use on data center & high density optical networks
Service Life	500+ activations

**Before and after end face pictures, after just one click!**

The last thing you want in your fiber optic network is signal loss. The primary cause of signal loss is dirty bulkhead connectors and end faces. Plugging a dirty component into another can damage fiber optic cable and even expensive equipment. This rugged precision cleaner uses a smooth click-to-clean push-action, with light contact force to reduce the risk of end-face damage. With 500+ cleans, it is perfect for cleaning MTP/MPO connectors in high density network applications such as data centers, FTTH and central offices. Engineered for MPO and MTP multifiber connectors, it cleans flat polished PC/UPC multimode and angled APC singlemode connectors.
