**1** Remove 2" of cable jacket, carefully avoid nicking any conductor.
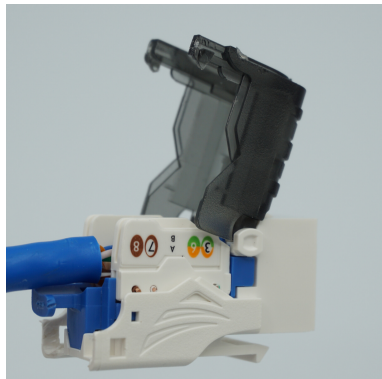

2 Push green & blue pairs through the underpass (assuming T568B code).

3 Verify conductors are seated according to T568A or T568B code.
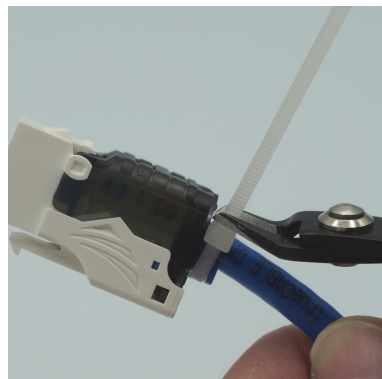

4 Carefully flush cut conductors from the sides.

5 Place cap into jack housing.

6a Snap closed. You will hear a distinct click.

6b **OR** use outer jaws of our trueCLOSE tool to snap jack closed.

7 Insert nylon tie and cut.

8 All done!
