

## Seat Height

Measure from the ground to the top of the chaise cushion.

## Width

Measure the widest side of the chair from left to right.

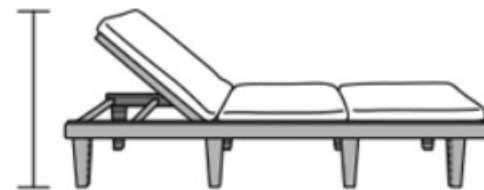

\*Start measurement at the leg base or arms, whichever is the widest point.

## Depth

Measure the deepest side, adjacent to the width, of the chaise from left to right.

\*Start measurement at the top or bottom of the chair back if the furniture has a curvature design.

## Height

Measure from the ground to the top of the upright chaise.

\*We recommend a cover 1-2 inches shorter than the furniture for breathability.
