A woman with dark hair, wearing a white short-sleeved top and olive green cargo pants, is walking barefoot on a vast, golden sand dune. The background shows the undulating curves of the dunes under a soft, warm light, suggesting sunset or sunrise. The overall mood is serene and minimalist.

KATARI BEAUTY

We took the hard road of directly sourcing the most exquisite, pure, and elemental natural ingredients and accessories from the Mediterranean. We support the ancient crafts of artisans and the timeless simplicity in beauty.

There is only one grade in quality -
THE BEST

Our PHILOSOPHY

Returning pure & elemental beauty TO THE WORLD

We want to make sure you see everything from the fields, to the people, to the bottles - our entire process.

When we source a rose water, it is the best one in the world. When we hand-pick clay, it took us 10 years to find the perfect clay with the chemical composition we were looking for.

We take it all extremely seriously.

Kate | Founder:

Years ago as a teenager, I traveled throughout the Mediterranean doing translation work and fell in love with the hospitality of its people and the simplicity of their ancient beauty rituals.

Now, I travel there to work with artisans, so that together we can preserve their crafts, support their families, and share with the world the beauty they create.

And to bring our complex world closer together... through beauty and laughter.

Purveyors of elemental beauty

SIMPLE TO THE CORE

From fields, to seeds, to makers, and sustainable handmade glass packaging — we make beauty clean & simple.

And also ELEMENTAL — there is only one powerful ingredient in each product.

Zero PRESERVATIVES

The reason why we do not worry about preservatives is because the way our products are made and the choice of ingredients. They do not require preservation.

And we are happy to stay preservative-free... naturally.

Sourcing & Ingredients

Vapor-distilled HYDROSOLS

📍 BEJA FOOTHILLS

The gold standard of making a flower water is through process of vapor-distillation. We take it a few notches up. Our rose water, Roseau, is only made a few weeks a year (in May) and we preserve all rose essential oil, making our rose water the most decadent hydrosol ever.

Cold-pressed OILS

📍 DELTA OF THE NILE

It is well-known that cold-pressed oils keep their benefits and micro-elements at the height of their potency. We source all our oils from wild seeds or organically grown plants.

Hand-picked GREEN CLAY

📍 ATLAS MOUNTAINS

Katari rare Argil Green Clay is sustainably sourced in the summer at our remote quarry. No additional processing is needed - just milling the clay into a fine powder... that's all.

Every piece is 100%
HANDCRAFTED

Artisansal

No mass production.
Each product & accessory
is handcrafted by Mediterranean
artisans.

Plastic-free

We package our products
in handmade glass.
Every bottle, jar, and 'amphorae'
is imperfectly perfect
and unique.

Elemental

Our artisans use ancient
methods and processes
of creating single-ingredient
beauty and handmade
accessories.

Plastic-free HANDMADE GLASS

By making our own lab-grade, neutral glass, we help create a sustainable living for dozens of glassmakers in the Mediterranean.

We decided to use sustainably grown cork instead of plastic closures. It is simple & bio-degradable and allows our products to breathe without oxidating.

We still offer some conventional packaging, but we advocate for re-using travel size packaging. Refills are available to prevent waste.

NON-REACTIVE GLASS

Handmade ACCESSORIES

Neutral ingredients & good for the Earth

UNESCO – famous pottery

Made raku-style without a pottery wheel and fired in a low temperature fire – each mixing bowl is a work of art and a delight for any beauty ritual.

Sustainable olivewood

Every olive wood spoon, spatula, and oil applicator wand is carefully hand-carved out of sustainably grown trees.

KATARI REFILLS

Skip packaging **RE-USE, & REFILL**
