

Jet Setting Skin Kit

This trio makes packing your beauty regime a breeze.

Hoba - naturally hypoallergenic, pH-neutral plant wax (oil) serves as makeup remover, cleanser, moisturizer, hair conditioner, hair styler, beard conditioner and body moisturizer.

Poudre de Barie exfoliating, collagen-boosting powder can be used as a scrub to keep your skin in perfect condition through climate changes and travel stress.

Roseau - Mediterranean rose toner, prepares your skin for treatments and eliminates environmental pollutants - treat your skin to the best and most natural products no matter where you are!

Moisturize, prime, and cleanse skin daily with pH-neutral Hoba

Hoba, - 100% pure cold-pressed jojoba oil is our daily favorite and we do not go anywhere without it. It is so gentle, you can use it on newborn babies and it is so perfectly neutral, it works wonders on oily skin to stop it from producing more oil. Instead of trying to dry your skin, add more oil and you will see all of a sudden that your skin is no longer oily - because it has enough oil and it does not need to produce more.

When you travel, Hoba quickly becomes an indispensable do it all oil - a daily moisturizer, cleanser, lip and cuticle oil, a hair conditioner, beard oil, shaving oil, primer before makeup and makeup remover.

The best way to use Hoba as your daily moisturizer is on freshly washed, clean and slightly wet, warm skin. Try applying a few drops of Hoba right after massaging a few drops of Roseau (rose toner) into your skin. The oil will soak right in and will leave your skin feeling smooth, hydrated, and very soft.

Tone and lift skin with Roseau (rose toner)

A flower with highest vibrational energy of all plants, rose is a masterpiece of nature. To create a product that takes essence of rose without destoring its healing superpowers takes masters in the craft of rose water vapor distillation. It is not water you are putting on your face, it is essence of rose itself.

This is how we use rose water (daily). In the morning, after shower apply a few drops to face (using fingers or cotton round) and tap the rose water into your skin until almost dry. This insures that the toner delivers the most benefits. After that always follow with a moisturizer like Hoba Oil. At night repeat the same steps as in the morning - cleanse the face, tap the rose toner into your skin and add your favorite night serum (Barie Oil or Rosehip Oil). Or use more Hoba, when traveling less is more and Hoba is perfectly enough to protect and moisturize skin. You can also use your Roseau to refresh skin and even hair during the day.

Renew & nourture skin with Poudre de Barie

Poudre de Barie is made from prickly pear cactus seeds left after cold-pressing of our famous Barie oil. It is hard to use by itself, it needs to be mixed with something like an oil or clay masque. Here is how we use it 1 to 2 times a week when we travel. Just remember - do not overexfoliate! If you already exfoliated or had some spa procedures done, use gentler cleansing methods and let skin heal before using Barie powder.

Mix with an oil - add a pinch of Barie powder to your hand and mix with a few drops of carrier oil (like Hoba - jojoba oil), apply to clean, slightly wet face and massage gently into skin. You can leave it on for 20-30 minutes if you like and then rinse off. No additional moisturizer will be needed.

If you grabbed your clay masque on your trip, you can **boost your facial masque with Barie Powder** (add to Katar Argil) in equal proportions - about 1 tsp of powder and 1 tsp of Argil green clay and add 2-3 spoons of water, until you get a creamy (not super thick) consistency. Apply to skin avoiding eyes with fingers or a brush (or a spatula, or a sponge) to clean, slightly wet skin. Leave sit until almost dry and rinse off with warm water. You might not need a moisturizer after this masque. Your skin will tell you.
