4. First Aid Measures

4.1 Description of first-aid measures

General advice Ensure that medical personnel are aware of the material(s) involved, and

take precautions to protect themselves. Show this safety data sheet to the

doctor in attendance.

comfortable for breathing. For breathing difficulties, oxygen may be

necessary. Call a physician if symptoms develop or persist.

In case of skin contact

Take off immediately all contaminated clothing. Get medical attention if

irritation develops and persists. Wash skin thoroughly with soap and water

for several minutes.

In case of eye contact Remove contact lenses, if present and easy to do. Get medical attention if

irritation develops and persists. Promptly wash eyes with plenty of water

while lifting the eyelids.

If swallowed Call a physician or poison control center immediately. If swallowed, rinse

mouth with water (only if the person is conscious). Do not induce vomiting. If vomiting occurs, the head should be kept low so that stomach vomit doesn't

enter the lungs.

Personal protective equipment for first-aid responders

No data available.

4.2 Most important symptoms/effects, acute and delayed

No data available.

4.3 Indication of immediate medical attention and special treatment needed, if necessary

No data available

5. Fire-Fighting Measures

5.1 Suitable extinguishing media

Water spray, fog, CO2, dry chemical, or alcohol resistant foam.

5.2 Specific hazards arising from the chemical

Limonene: Static charges generated by emptying package in or near flammable vapor may cause flash fire. Fire

may produce irritating, corrosive and / or toxic gases.

Beta Caryophyllene: Carbon oxides.

5.3 Special protective actions for fire-fighters

In case of fire and / or explosion do not breathe fumes. Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. Water runoff can cause environmental damage. Ventilate closed spaces before entering them. Keep runoff water out of sewers and water sources. Dike for water control.

Further information

No data available.

6.Accidental release Measures

6.1 Personal precautions, protective equipment and emergency procedures

Biscotti

Keep unnecessary personnel away. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Eliminate all sources of ignition. Avoid contact with skin or inhalation of spillage, dust or vapor.

6.2 Environmental precautions

Prevent further leakage or spillage if safe to do so. Do not contaminate water. Retain and dispose of contaminated wash water. Avoid release to the environment. Contact local authorities in case of spillage to drain / aquatic environment

6.3 Methods and materials for containment and cleaning up

Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb with inert absorbent such as dry clay, sand or diatomaceous earth, commercial sorbents, or recover using pumps.

The product is immiscible with water and will spread on the water surface.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Prevent product from entering drains. Do not allow material to contaminate ground water system. Absorb in vermiculite, dry sand or earth and place into containers.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills in original containers for re-use. This material and its container must be disposed of as hazardous waste. Collect and dispose of spillage as indicated in section 12 of the SDS

7. Handling and storage
