

**Datasheet for 15-134**

**Target Description:** Anti-Centromere Antibodies (derived from human CREST patient serum) are useful as controls in ANA diagnostics and also react with other species including mouse, rat, and hamster.

<b>Format</b>	Antisera
<b>Concentration</b>	Lot dependent
<b>Clonality</b>	Polyclonal
<b>Applications</b>	ICC
<b>Host Species</b>	Human
<b>Molecular Weight</b>	n/a
<b>Species Reactivity</b>	Hamster, Human, Mouse, Rat
<b>Physical State</b>	Liquid
<b>Conjugate</b>	Unconjugated
<b>Quality Control</b>	Serum obtained from an autoimmune patient was tested at a series of dilutions by immunocytochemistry on ethanol-fixed Hep2 cells that were in log-phase growth. The staining pattern obtained was consistent with the pattern expected for anti-centromere staining.
<b>Usage Statement</b>	These antibodies are to be used as laboratory reagents for research and diagnostic in humans. The product must not be for therapeutic use in humans
<b>Country of Origin</b>	United States
<b>Expiration</b>	Lot Dependent, 18 months from manufacturing
<b>Synonyms</b>	CREST, Centromere
