Whole Serum Immunoglobulins

Catalog Number: 43-500 Series

Species Reactivity: N/A

Product: Whole Serum Immunoglobulins

Storage Solution: Phosphate
Buffered Saline, 0.1% Sodium Azide

Immunogen: N/A (from normal sera)

Applications: Assay controls, blocking agents

Storage: Store at 2-8 degrees C. Freeze for long term storage.

Product Description

Whole Serum Immunoglobulins are prepared from normal sera using ammonium sulfate and ion exchange chromatography. These products contain at least 80% IgG and small amounts of IgA and IgM by densitometry of electrophoretically separated samples. The product is an inexpensive source of IgG and is excellent for non-immune controls or blocking agents.

Whole Serum Immunoglobulins, 43-500 series, are available in 10 and 50 mg sizes.
