Accelerating Discovery Through Immunochemistry

## *Purified IgG*

**Catalog Number:** 43-600 Series

**Species Reactivity:** N/A

**Product:** Purified IgG

**Storage Solution:** Phosphate  
Buffered Saline, 0.1% Sodium Azide

**Immunogen:** N/A (from normal sera)

**Applications:** Non-Immunune controls, blocking  
agents

**Storage:** Store at 2-8 degrees C, For long term  
storage store frozen.

## *Product Description*

These immunoglobulins of the IgG class are purified from normal sera by Protein A/G chromatography using the mildest elution conditions to yield a highly purified IgG. For some applications ion exchange and other chromatographic separation techniques are used. The products are at least 95% pure IgG.

Purified IgG, 43-600 series, are available in 2, 10, 50, and 100mg sizes.
