

Track Saw System

The system includes:

7' Section of track

5' Section of track

4 Track brackets

Heavy duty wall saw carriage

Wolverine handsaw quick connect brackets

Track connector bracket

Wolverine Equipment's Track Saw System brings an entirely new approach to using your Wolverine hand saw.

BENEFITS

- Cut more safely & easily: eliminate fatigue and risk of kickback when using the wall saw system.
- Cut straighter: the track system ensures perfectly straight cuts.
- Cut faster: Let the system do the work and see productivity soar.
- Cut deeper: use the 20", 24" or 30" Wolverine saws to cut up to 12" thick walls
- Flush cut: safely flush cut using your flush cut combo handsaw.
- Increased blade life: track mounting your handsaw will increase blade life by up to 50%
- Increase your profit: this Wolverine is affordable and can be run using your existing Wolverine hand saw and power pack.

FEATURES

- Powder-coated steel track is lightweight, very strong and can be set up easily.
- Heavy duty carriage holds the saw securely.
- Gear driven system can be run with hand crank or hand drill.
- Quick disconnect system: allows you to mount your handsaw to the track system in seconds.
- System is expandable; additional tracks can be purchased separately.
