

# Dust Collection System

Now in effect,  
 OSHA's respirable crystalline  
 silica standard  
 Mandatory compliance begins 6/23/2017

A-5SCW with Dust Collection

## Features

- Venturi style suction
- Manual or automatic purge control
- The Minnich dust collection system meets the requirements for dowel-pin drills found in Table 1 of the OSHA respirable crystalline silica standard, 29 CFR 1926.1153, when used with an appropriate filter. The filter supplied with the Minnich dust collection system complies with OSHA's Table 1 filter efficiency requirement.
- Available on all models
- Adapts to competitor's drill units
