

# K9 Fastener Facts

**STRONGER-** Not only does K9 Fasteners apply 3 coats of ceramic protection but we also apply an additional yellow zinc plated base coating directly over our C1022 steel.

**STRONGER-** Our Doberman ASTM tests reveal over 1,900 lbs. of pull out force and over 2,600 lbs. of shank shear force on respective sizes. (Complete test data on page 10 of the catalog)

**FASTER-** Our customers testify that the 3x coating has an additional benefit of reducing drive resistance and torque which provides faster set times and longer battery life.

**FASTER -** In house tests reveal our Quick-bite tip cuts faster and starts faster than the competition.

**VALUE-** Many retailers who sell fasteners by the pound have stated that when merchandised alongside of competitors, K9 products out sell the competition 5 to 1.
