

FUEL TRAILER 500L

SELF BUNDED LOW PROFILE DUAL AXLE

SKU: SBS500

The iFUEL SBS500 Self Bunded Fuel Trailer is designed specifically for the transport of flammable liquids such as Petrol, Kerosene, JET A1 and AVGAS. Being under 500L this trailer can be driven on road without the need for a dangerous goods licence.

The SBS500 Self Bunded Fuel Trailer is supplied with a longer chassis to provide a safe separation distance for the 12V power and control system needed for flammable liquids dispensing.

PRODUCT FEATURES

- **Self Bunded** - True self bunded, tank in tank design.
- **Tare Weight** - 790kg
- **Fully Approved** - designed and approved to meet the requirements of AS1692, AS1940 and Australian Dangerous Goods Transport Regulations.
- **Tried and Proven** - we have been manufacturing and supplying this design trailer for more than 10 years now. It is a tried and proven option for the transport of flammable liquids including Petrol, Kerosene, AVGAS and JET A1
- **Removable Inner Tank** - The primary tank module can be removed for maintenance. For AVGAS and JET A1 applications we provide a 304 SS Primary Tank with 304 SS Wetted Parts.
- **Separate Tank and Trailer Chassis** - the secret of our success, our tank body is protected from the twisting and rigours associated with road towing and use. Our chassis is designed to take the mechanical stresses and strains of in field use, protecting the tank body from the risks of cracking over time.

- **Dispensing Options** - common dispensing options include High Flow Manual Pump or Flammable Rated 12V Dispensing System with Battery Pack
- **Baffled** - our self bunded tank module is fully baffled ensuring stability when towing loaded.
- **Roof Mounting Options** - The trailer roof allows for mounting of a Spill Kit or other site support equipment
