Introduction

Most people understand that we have an immune system and that it is responsible for keeping us healthy but how much do you really know about it?

The word immune comes from the Latin word *immunis*, meaning “exempt”, "free" or "untouched". It is understood to be the system that protects the body like a guardian from harmful influence and is essential for our survival.

The immune system is a complex intricate and fascinating network made up of different organs, cells, microorganisms and proteins. There are many different systems in the body including nervous system, digestive system, circulatory system, blood system etc. These systems are obviously not entirely independent nor mutually exclusive. All systems, including the immune system rely on our microbiome and engage in each other and there can be overlapping between them. The homeostasis or harmony in these systems will determine overall immunity.

A weak immune system is currently recognized by pathogenic microbe growth and it is believed that these pathogens are causing most of our diseases. New research however, is revealing that pathogenic growth is not the cause of our disease, but rather the cleanup crew doing its utmost to restore balance within a corrupted system.

Common examples of a failing immune system are autoimmune diseases, cancer and chronic inflammations, including allergies, arthritis, asthma, and others with obvious signs of inflammation, but also to Alzheimer's, anxiety, chronic fatigue, depression, emphysema, fibromyalgia, heart disease, obesity, osteoporosis and stroke where you may not notice an inflammation.

New research is revealing that all health deterioration has a common link, being mainly caused by a combination of disturbed microbiome, inferior nutrition, inherited weaknesses, pollution, excessive stress and negative mental-emotional aspects. Our nutrition greatly affects the quality of our immune system and our mental-emotional aspect, which in turn, has a significant impact on the type and location of any developing health problem.

Further contributions to overall health and immunity stem from our family background. We are strongly affected by what our parents and grandparents ate, thought and felt, and by the infections and diseases with which they were afflicted. Generally we do not inherit diseases as such, but rather it is our learned stress responses that can produce weaknesses in specific organs, glands and functions. Toxins and waste products always distress the weakest organs and tissues, resulting in similar familial patterns for dealing with stress.

There are very good reasons to understand how our immune system works. When you understand all that it does for you, and how everyday things affect it, you can support it to help keep you well and thriving.

What is an Infection?

We are continually exposed to toxins, antigens (an antigen is a molecule capable of inducing an immune response), chemicals, heavy metals etc. When our immune system is working properly, we may not even notice an incoming issue but if we have an under or over-active immune system, we are at a much greater risk of developing a health issue.

The current view maintains that an infection is caused by a proliferation of certain pathogens - germs/microbes. Louis Pasteur conceived the germ theory of disease and invented pasteurization to kill all the nasty germs.

Mainstream medicine is built on this theory that disease comes from the outside by pathogens invading the body and is inflicted upon the innocent helpless person.

According to Pasteur:

- Germs, or microbes, cause disease
- Germs invade the body from the outside, i.e., air, water, or food
- Human blood is sterile and can only be infected by outside microbes

- Germs are monomorphic, i.e., they have only one form and can be identified by species

William Koch attempted to add to Pasteur's germ theory by proving that a specific type of germ caused a specific disease, that the germ would be found in all people suffering from that particular disease but not healthy people, and that every person exposed to these germs would fall ill with that disease.

This theory was blown apart when he discovered that healthy people could carry the germs of certain diseases and yet show no symptoms and that some people could even be exposed to virulent germs yet not catch the disease.

Regardless of this controversy in the late 1800s, the Germ Theory was quickly adopted by the medical powers of the day. This theory that microorganisms invade from outside the body empowered the medical and pharmaceutical industry as guardians of human and animal health. So people became dependent on the medical/drugs industry for information and protection from disease. Thus, Modern Medicine was born.

Historically those who presented findings that challenged the long held dogma of the Germ Theory were silenced. Individuals such as Royal Raymond Rife, Professor Antoine Bechamp, Claude Bernard and numerous others provided substantial evidence revealing the true nature of the human microbiome.

Thankfully brave new researchers are breaking free from the old dogma that has locked us into a failing health and ecosystem. Their efforts are providing information, that when understood, changes our view of the very basis of life. This new information can propel us towards restoring not only human health but the very health of our planet.

Before we delve deeply into the components that support a healthy immune system, it is important to first gain a basic understanding of how this marvelous system works.

What is the Microbiome

The microbiome is a community of microorganisms, such as bacteria, fungi, parasites and viruses that inhabit a particular environment.

A microbiota is the community of these symbiotic microorganisms found in and on all plants and animals. The human microbiota is the aggregate of microorganisms that resides on or within any of a number of human tissues and biofluids, including the skin, mammary glands, placenta, seminal fluid, uterus, ovarian follicles, lung, saliva, oral mucosa, conjunctiva, biliary and gastrointestinal tracts.

Our healthy microbiota includes bacteria, archaea, protists, parasites, fungi and viruses. Our microbiota has been found to be crucial for immunologic, hormonal and metabolic homeostasis (balance).

DIVERSITY IN THE HUMAN MICROBIOME

The Human Microbiome Project has examined bacteria on 242 people. Some of the microbes living in and on the human body:

Propionibacterium acnes lives on the skin and nose of most people

Bacteroides is the most abundant genus in the gut of almost all healthy subjects

E. coli is present in the gut of the majority of healthy subjects but at very low abundance

Streptococcus dominates the oral cavity

Staphylococcus epidermidis colonizes external body sites

Lactobacillus species are predominant in the vagina

SOURCE: Human Microbiome Project

It is fascinating to realize that the very critters we have been taught to fear, are in fact essential to the health and function of our immune system. In fact, they are critical for our very survival.

What is the Immune System

The human immune system is not a singular system; rather it is a network of organs, glands, tissues, microbiota and cells comprising many biological

structures and processes that work in concert to keep our body balanced and healthy.

The main parts of the immune system are: white blood cells, antibodies, the microbiome, lymphatic system, spleen, thymus, and bone marrow. These are the parts of your immune system that actively fight infection.

The inner and outer surfaces of the body are our first barriers against immunologic issues. These surfaces include the skin and all mucous membranes, which form a protective wall. Endothelial and epithelial cells that make up these tissues act like an interface between the underlying layer and the outside environment. Endothelial cells lie 'inside' the body and epithelial cells are often described as lying 'outside' the body as they make our skin.

Endothelial cells form a thin layer that coats the inner surface of blood vessels. These cells make up the vessel wall. So, the inner wall of the entire circulatory system is covered with endothelial cells. These cells act as an interface between the circulating blood and the vessel wall. The endothelium is one-cell-layer thick and your immunity depends on it.

CAPILLARY

Epithelial cells not only make up your skin, but also provide a coating to all the internal organs of the body forming a protective barrier against the external

environment. The epithelial cells also line the inner surface of the liver, stomach, intestine, lungs, urethra, urinary bladder, and other organs of the body.

Your skin is more than just a physical barrier however; it is actually an active immune organ with a unique microbiota.

Skin

Healthy skin has an intact skin barrier and a balanced microbiome, which typically means a high level of microbial diversity. Our skin is home to millions of bacteria, fungi, parasites and viruses that comprise the skin microbiota. A healthy skin microbiota protects against infection in much the same way a good gut microbiome does, by keeping in check the overgrowth of organisms - keeping the balance.

It is now understood that many chronic skin issues have a direct relationship to the microbiome in the gut. If the gut is depleted of essential bacteria the imbalance is often expressed through the skin.

Gut Microbiome & Your Immunity

When you eat food, none of it actually goes into your cells. We eat to satisfy our microbiome; all the bacteria, fungi, viruses and parasites in our gut! These critters breakdown our food into 3 macro nutrients, fat, sugars and protein. Our liver converts protein into glucose and the bloodstream feeds the mitochondria. The mitochondria convert the fat and glucose into the only source of food our cells can use Adenosine triphosphate (ATP).

ATP is often referred to as the "molecular unit of currency" because this is the chemical found in all forms of life that feeds living cells. Understanding that the mitochondria are bacteria, we begin to realize that our very survival is dependent on the microbiome. Quite humbling to consider that human life – all biological life – depends on non human species for survival.

Keeping the gut microbiome healthy is essential when we desire a strong immune system.

Prebiotic & Probiotic

Consuming a pre/probiotic can provide dramatic assistance to restoring gut microbiota. Every day our gut bacteria is compromised due to poor dietary habits and lifestyle factors such as pesticides, chlorine, fluoride, pollution, stress, vaccinations and antibiotics. When digestion is not good our ability to focus and concentrate, absorb vital nutrients and withstand disease is also jeopardized.

Prebiotics are food components that give the beneficial bacteria (i.e. probiotics) nourishment and thus a chance to grow and flourish. Our prebiotic levels can be naturally boosted by eating lots of fruit and vegetables, however if digestion is not optimal our ability to absorb these vital nutrients does not happen - in comes probiotics!

Consider that right from the moment we are born, the human body becomes a host for microorganisms. This includes the beneficial bacteria in our intestinal tracts, simply called probiotics.

These “friendly” bacteria are essential to healthy immune function and perform a number of important tasks including breaking down nutrients and keeping “harmful” bacteria in our gut in balance.

Dr Zack Bush MD has provided ground breaking research demonstrating the hazards of glyphosate; commonly known as Round-up. Glyphosate is a patented antibiotic designed to kill the weeds in garden crops and also kills the microorganisms in the soil. Antibiotics are designed to kill all pathogens (bacteria, fungi etc.) – hence the name - antibiotic literally means anti-life. Knowing that our very survival depends on these organisms brings to question this approach of mass slaughter of the very organisms that enable your body to live.

What is the Tight Junction

Dr Bush has clearly shown that glyphosate damages not only the microbiome of the soil but also our immune system. Eating crops that have been treated with this chemical destroys the Tight Junction, the very structure of our cellular network that protects us from toxins and foreign materials from getting into the body where they do not belong.

A healthy gut is KEY to a healthy immune system.

**INFLAMMATORY, IMMUNOLOGICAL,
AUTOIMMUNE AND NEOPLASTIC REACTIONS**

When the Tight Junction is damaged, foreign materials, wastes & toxins enter into deeper tissues, the body's automatic protection method is to generate inflammation in an attempt to flush out the debris. Research conducted by Dr. Bush clearly demonstrates how the damage to the Tight Junction and cellular communication network directly leads to compromised immune function and autoimmune disorders.

Nascent Iodine

Many holding a natural health orientation believe that iodine is an essential foundation nutrient for healthy immune function. Daily exposure to toxic halogens, in the form of chlorine, fluorine and bromine take up the cellular receptor sites for a halogen unless we have the nutritional halogen available in the body. Iodine is the nutritional halogen. Your body is innately intelligent and will hold onto toxic halogens unless the nutritional halogen is available.

Chlorine is now almost universally used to purify municipal water supplies instead of iodine. Fluoride is now found in almost all toothpastes and municipal drinking water and bromine, known to cause cancer, replaced iodine in commercial baked goods more than three decades ago. Bromine is also a fire retardant and used in fabrics, building materials, plastics, fuel, etc...

Iodine is one of the most important minerals that your body requires for healthy cellular and metabolic functioning. The book by Dr. David Brownstein, Iodine: Why You Need It and Why You Can't Live Without It, sums up its importance:

"Iodine is the most misunderstood nutrient. After 12 years of practicing medicine, I can say that it is impossible to achieve your optimal health if you do not have adequate iodine levels. I have yet to see any item that is more important for promoting health than iodine."

If Dr. Brownstein is right, and I agree that iodine deficiency is a major problem - our drop in iodine intakes might be contributing to many major health problems.

Low iodine can also contribute to fatigue and CFS. A study showed that people with low body temperature and fatigue felt better and had more energy when they took a daily supplement of 1,500 mcg (micrograms) of iodine - 4 drops of Miracle Products Nascent Iodine. The RDA for iodine is a mere 150 mcg, this is the minimal amount required to avoid goiter and there is so much evidence to support that our bodies actually require much more in order to maintain health.

Miracle Products Nascent Iodine is a unique atomic form of iodine that is non-toxic, rapidly absorbed and used by every cell in the body. It is known that a lack of iodine is relational to a spectrum of disorders: goitre, hypothyroidism, various auto-immune diseases, diabetes, bronchial asthma, lung disease, dermatological problems, Candida and other microbes, irritable bowel, fibromyalgia, chronic fatigue syndrome, hyperactive disorder, attention deficit disorder, mental retardation, cretinism, and fibrocystic breast disease. Iodine deficiency can cause breast cancer, uterine cancer, ovarian cancer, prostate cancer, testicular cancer, thyroid cancer, and lung cancer.

“Iodine deficiency we get is partly a result of toxicity from Fluoride and Bromine. Bread has ten times more Bromine in it than it used to and the sources of Fluorine are nearly ubiquitous today. So who does not need Iodine? I find that nearly everyone needs more than they are getting.” Dr. Garry F Gordon

Iodine supports your total body physiology as well as helps the elimination of heavy metals and other toxins. Iodine offers a serious and potent replacement for much of the antibiotics that are literally destroying people's lives and can be used safely with children. Nature and evolution have given us an important nutrient to restore balance in our microbiome and we should use it and trust it to protect us in ways that antibiotics can't.

Even Safe for Children - Nascent Iodine, though more expensive, actually tastes and feels good while going down!

Iodine deficient people, suffer physical, neurological, mental, immune and reproductive diseases. Iodine is important in the proper function of the nervous system and Dr. S. Cunnane suggests that “iodine is the primary brain selective nutrient in human brain evolution.”

Nascent Iodine Is Your Master Thyroid Nutrient

As a component of the thyroid hormones thyroxine (T4) and triiodothyronine (T3), iodine is essential to human life. Without sufficient iodine, your body is unable to synthesize these hormones, and because the thyroid hormones regulate metabolism in every cell of the body and play a role in virtually all physiological functions, an iodine deficiency can have a devastating impact on your health and well-being.

Miracle Products Nascent Iodine is pure goodness derived from rock crystal.

Iodine that is sourced from seaweed can contain impurities found in the ocean such as arsenic and/or bromine in quantities that are not desirable or healthy.

Nascent Iodine is more effectively absorbed and utilized than molecular forms of iodine (i.e. potassium iodide), or iodine containing foods such as seaweeds.

Blood Dragon

Blood Dragon provides a carefully selected combination of five herbs that can deliver potent immune enhancing properties. Each of these wild crafted herbs is known for specific anti-microbial benefits that can accomplish profound detoxification from every major organ and system in the body.

Blood Dragon provides a potent combination of 5 immune restorative herbs:

Blood Root
Galangal
Chaparral
Graviola
Cats Claw

Each of these herbs are rich in various major flavonoids, terpenoids and alkaloids such as, sanguinarine, berberine, chelirubine, isopteropodine, sanguilutine and the opium alkaloid protopine. Blood Dragon herbal mixture can help restore the balance of microorganisms in the body and is renowned for its anticancer, antioxidant and anti-inflammatory benefits.

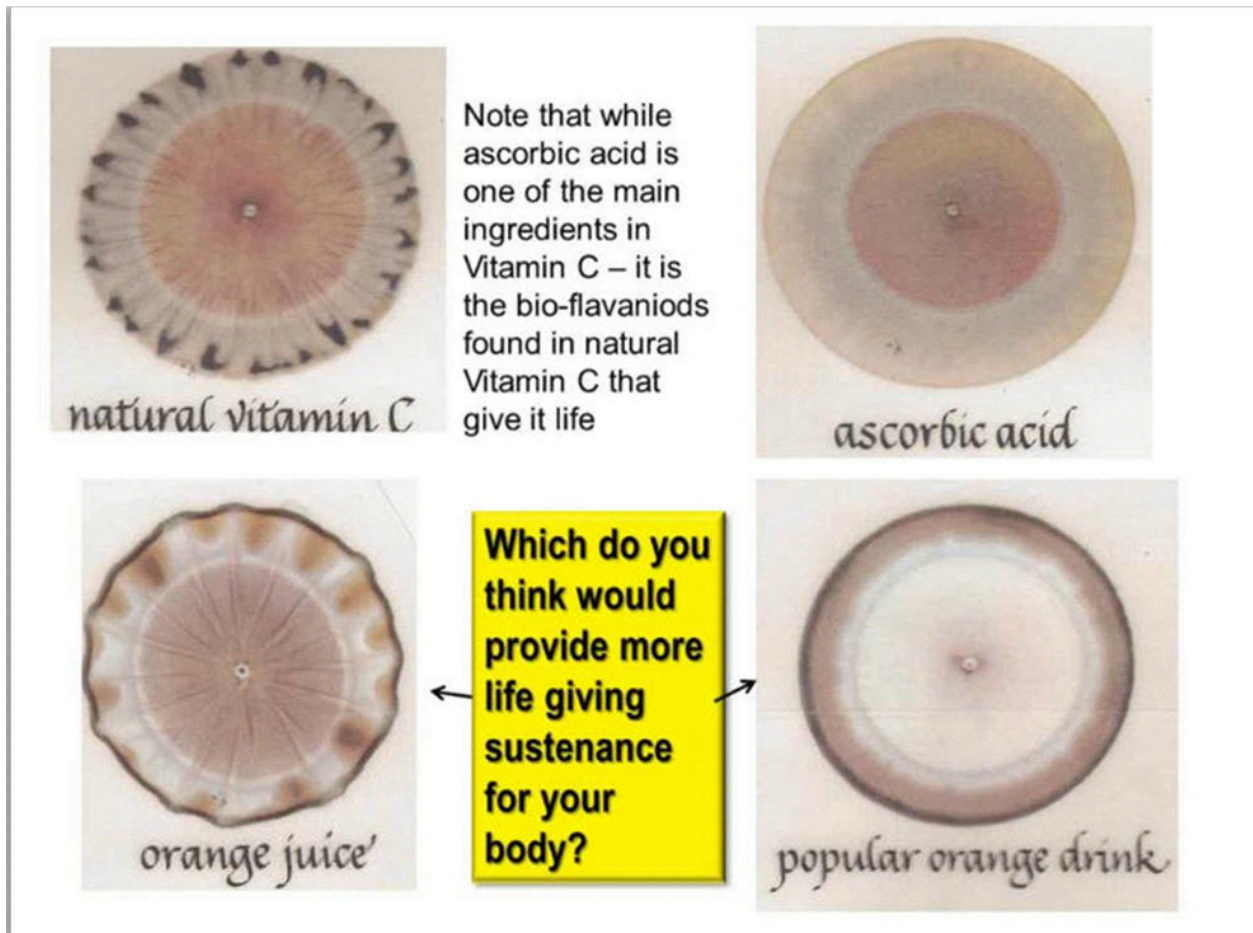

The most impressive properties of these herbs have proven to be effective in restoring cellular health from a diverse range of cancers; however in their natural whole state they cannot be patented. As a result, each of the isolated alkaloid molecules of these herbs, are undergoing extensive testing by various pharmaceutical funded universities and laboratories to develop expensive patented cancer drugs.

In 1989, Dr. Klaus Keplinger successfully demonstrated (and patented) several alkaloids present in Blood Dragon, that stimulate the immunological system. According to his patent, pronounced enhancement effect on phagocytosis (the ability of the white blood cells and macrophages to engulf and digest harmful microorganisms, foreign matter and debris).

Why Wait For Expensive Drugs When Nature Provides Exactly What The Body Needs At A Fraction Of The Cost?

Natural vs. Synthetic

Molecules of pharmaceutical drugs are all strange to the human body. History has shown that the human body is far more responsive to healing using natural substances, as opposed to synthetic. Just like ascorbic acid vs. natural vitamin C, Szent-Gyorgyi, who won the Nobel Prize for his discovery of vitamin C in 1937, found that he could not cure scurvy with the isolated ascorbic acid itself. Realizing that scurvy could always be cured with the “impure” vitamin C found in simple foods, Szent-Gyorgyi recognized that other factors had to be at work in order for vitamin activity to take place.

Camu Camu Extract – Natural Vitamin C

Synthetic vitamin C or ascorbic acid is not found in nature it is produced in a lab. Ascorbic acid is not a complete vitamin as it is only the outer layer of the complete complex known as vitamin C.

Eating ascorbic acid is like eating an orange peel and throwing away the orange.

The complete complex of vitamin C as found in natural food sources is composed of these elements: rutinbioflavonoids, tyrosinase, Factor K, Factor J, Factor P and ascorbinogen which are essential in order for the body to absorb and benefit from the vitamin complex.

Camu Camu (*Myrciaria dubia*) is a berry grown in Peru that provides a rich source of powerful phytochemicals with exceptional immune benefits. These include the amino acids serine, valine, and leucine, as well as more natural Vitamin C than any other known botanical in the world. The effects on the human body are incomparable.

Camu Camu Extract
60 times more vitamin C
than an orange, has 10 times more iron,
3times more niacin, twice as much
riboflavin and 50 times more
phosphorus.

Clinical evidence suggests that natural food sources of Vitamin C are far more effective - milligram for milligram - than synthetic Vitamin C (ascorbic acid).

Camu Camu contains bioflavonoids, phytochemicals and other co-factors that enhance vitamin C's efficiency and utilization by the body.

Natural Food Sourced Vitamin C

Ascorbic Acid

Chromatography reveals the difference between ascorbic acid (synthetic vitamin c) and natural food source vitamin c

Szent-Gyorgyi discovered vitamin C in 1937. In all his research however, he found that he could not cure scurvy with the isolated ascorbic acid itself. Realizing that scurvy could always be cured with the “impure” vitamin C found in simple foods, Szent-Gyorgyi recognized that other factors had to be at work in order for vitamin activity to take place. Szent-Gyorgyi, together with Royal Lee came to understand, ascorbic acid, rutin, and the other factors, were synergists: co-factors which together sparked the “functional interdependence of biologically related nutrient factors.”

Each of the other synergists in the C complex has a separate function: – P factors for blood vessel strength, – J factors for oxygen-carrying capacity of red cells, – tyrosinase as an essential enzyme for enhancing white blood cell effectiveness. Ascorbic acid is just the antioxidant outer shell – the protector of all these other synergists so that they will be able to perform their individual functions.

“The more we study vitamin C, the better our understanding of how diverse it is in protecting our health, from cardiovascular, cancer, stroke, eye health and immunity for living longer” Mark Moyad, MD, MPH, of the University of Michigan

Camu Camu contains a rich profile of natural cofactors that support proper immune function.

Vitamin C is a potent anti-oxidant that prevents the premature oxidation (aging) of cells. It has been proven to support a strong immune system and cardiovascular health. Further research shows that vitamin C is involved in maintaining proper levels of serotonin in the brain. Serotonin is a mood-balancing neurotransmitter in the brain that is associated with a sense of well-being and happiness.

Camu Camu is energizing, mood lifting and highly effective in strengthening the immune system.

Natural food source vitamin C acts as a powerful antioxidant capable of neutralizing free radical damage to DNA and facilitates in detoxifying the body of harmful toxins and heavy metals. Vitamin C is a strong immune booster, protects the nervous system and prevents chronic diseases, including cancer. It also protects against heart attacks and strokes, while promoting vascular health and longevity.

Miracle Products
Certified Organic Camu Camu
berry extract is an antioxidant rich
100% natural fruit powder.

Most people in the modern world are suffering from micro-nutrient deficiencies simply because the commercial food crops are grown in nutrient exhausted soil. This is why the Rainforest is so important. Our Camu Camu trees are grown on the banks of a lagoon in an Amazon flood plain. What this means is that each year during the rainy season the river banks flood and our trees are six feet under water for almost four months. As the water recedes the soil and nutrient matter that has been moved around the Rainforest is re-deposited.

This natural cycle ensures the richest nutrient soil for the Camu Camu plants. From this soil, the Camu Camu trees are able to pull a natural density of vitamins,

minerals and amino acids in the exact ratios necessary for life. This is why the Camu Camu fruit is packed with a rich, balanced profile of unique, vital nutrients not available from any other source.

TranZinc

This wonderful anelectric mineral product provides a simple and effective multi-purpose health solution to various ailments. Originally it was medically administered by doctors as a disinfectant to treat chronic infections, strengthen the immune system while helping to regulate the heart, brain, kidneys, and other important organs.

TranZinc is a time tested formula produced according to the original crystalline method.

Every drop of TranZinc contains a pure Zinc-Boron crystal which is absorbed through the skin into the blood. Zinc is widely used to help reduce the duration of colds and harmful bacteria like streptococci. It is also used as a wound agent to promote accelerated healing on the skin. It is the original transdermal formula; a truly miraculous solution that can provide healing and relief when applied onto the skin and/or used internally.

TRANZINC FORMULA

Recognized as a natural and holistic solution that provides blood purification, treating burns, acne, scarring and rashes and many other uses including: feminine hygiene, athlete's foot, ulcers and varicose veins.

***Do Not Let TranZinc Formula Come In Contact With Metal.
Make sure to use glass or plastic for pouring and/or measuring.***

What is Anelectric

TranZinc Crystalline Formula is anelectric; meaning it generates infra-red heat caused by negative ions travelling at the speed of light. These are non-frictional

betionic, wet electrons. TranZinc is a true osmotic solution. This is the secret of the amazing healing and preventative powers of the TranZinc formula.

TranZinc will lose about 95% of its healing properties if it comes into contact with metal so use plastic spoons or squirt directly into a glass or cupped hand.

Also remember to take your rings off when rubbing it onto your body.

TranZinc is an all-natural solution that can provide healing and relief when applied to desired areas of the body. As a liquid, it absorbs directly into the skin and penetrates deeply to help restore the microbiome. It can be taken internally when mixed in distilled water.

A Multipurpose Healing Solution

Dr. L.E. Schweitzer was an inspired chemist who created the original formula as a mineral biological toxic. This means that it is a mineral formula that has been prepared in such a way as to have the effect of destroying gram-positive or anaerobic organisms, such as infectious bacteria, viruses, parasites and fungus. This formula has been sold throughout the world since early 1900's and it is not a drug or synthetic petrochemical.

It is a universal disinfectant which controls microorganisms (germs) but does not destroy normal cells and tissue.

Known as a universal solvent which helps to thin and purify the bloodstream; yet non-toxic, non-irritating and soothing to delicate mucus membranes. It has been proven to stimulate tissue growth and assists nature in restoring normal function.

Zinc is widely used to help reduce the duration of colds and harmful bacteria like streptococci. It is also used as a wound agent to promote accelerated healing on the skin.

Formulated With Three Essential Trace Elements

Zinc: A fundamental nutrient in supporting proper neurological as well as body functions, and present in all human cells and tissues, Zinc is required to manufacture enzymes that preserve the skin, strengthen the immune system, aids digestion, metabolizes fat, proteins, and carbohydrates while helping to regulate

the heart, brain, kidneys, and other important organs. Zinc is needed for immune function, wound healing, blood clotting, thyroid function, and much more.

Boron: Due to soil depletion this trace mineral is largely missing from our natural food sources. This trace mineral has been linked to providing relief from pain and is used medically to help alleviate arthritic symptoms like inflammation and immobility. It has been found to have the ability to strengthen bone density and is given to help sufferers of osteoporosis. Conversely, lack of boron has been linked to receding of the gum lines and tooth decay. Medical experts believe that boron has the ability to prevent allergies by killing the inflammatory bodies responsible for inducing allergic symptoms.

Salicylate: This is a naturally occurring chemical produced by plants that help to protect them against disease, highly concentrated in a range of fruits and vegetables and is commonly known as the active ingredient in the drug aspirin. Foods sources rich in salicylate are peppers, berries, tomatoes and basil. Salicylate has been documented to provide relief from pain and injury, as well as reduce fever and skin inflammation.

Transdermal Technology - Spray It On!

When used externally it soothes burns, cuts, blisters, rashes, hives, poison ivy, insect bites, eczema, psoriasis, nail fungus, athletes foot etc. It also repairs damaged skin such as scarring and acne. Plus it underarm odour, so apply it under your arms. Reduces varicose veins, bruises, hemorrhoids, and takes the sting out of sunburns.

Every drop of the liquid contains a pure zinc-boron-salicylate crystal, which is absorbed through the skin into the blood and tissue. There are thousands of pores on every square centimetre of your skin which absorb directly into the bloodstream and lymphatic system. Transdermal applications of nutrients bypass the digestive system and convey active ingredients directly into the body where they are needed most.

Internal Uses:

For internal use, start with just 1 tsp. in a small amount of water.

Make sure to use glass or plastic for pouring and/or measuring, **NO METAL**.

TranZinc will lose about 95% of its healing properties if it comes into contact with metal so pour directly into a glass and add water or use a plastic or wooden spoon.

TranZinc can be used internally as a mouthwash, ease earaches, feminine hygiene as a douche, digestive disorders, venereal diseases, purifying blood and normalizing pH balance.

We have found it's best to dilute TranZinc with distilled water when using this as a mouthwash, feminine wash or taking it internally.

TranZinc Formula Is 100% Natural and Recognized As:

1. Universal Disinfectant - controls microbes, but does not destroy normal cells and tissue.
2. Universal Solvent - helps to purify the bloodstream.
3. It is non-irritating to delicate mucous membranes, and it assists in soothing these membranes. It penetrates each layer of skin to eradicate unwanted microorganisms.
4. It is non-toxic and odourless. It works as a deodorant, alkalizes, assists nature to restore normal function.
5. It is pH balancing, anti-inflammatory, improves detoxification of cells and tissues.

Stops Unhealthy Germs Without Causing Mutations

Doctors know that antiseptics and antibiotics kill germs and healthy cells of the human body, resulting in new unhealthy germs, which the antibiotics cannot kill. There is a widespread acceptance of Biological Pleomorphism, which is the activity of a germ changing to a new form, to adapt to its new environment. Thus, when one changes the cellular environment with antibiotics, new germs develop in new qualities and virulence that increase the problem. In addition, because the healthy cells of the body are killed and depleted, as well as the unhealthy ones, important healthy flora levels are depleted, causing repeated infections to become more likely.

TranZinc Formula
stops the growth of anaerobic bacteria, fungi and viruses because it is a true disinfectant!

Increases Capillary Growth for Healing

Laboratory analysis indicated a positive increase in phagocytic cell activity in destruction of bacteria and other foreign substances, without any harm to surrounding tissue. Increases in fibroblastic and lymphocytic activity with increased epithelial cell growth, resulting in rapid healing of injured tissue, has also been observed.

Capillaries are the cells most involved in wound healing.

TranZinc increase capillary growth.

Rejuvenation & Beautification Effects

TranZinc formula aids in the rebuilding and restructuring of tissues during the “healing crisis” and “genetic restructuring”. It penetrates through the skin and increases the oxygenation and circulation to the tissue, which improves the metabolic function.

Use it on your face to smooth out wrinkles, increase skin elasticity, and maintain the microbiota of your skin!

Safety

For over 95 years in the use of the TranZinc formula, no contraindications have ever been observed.

Summary

Disease has become a multibillion dollar industry that is highly regulated. Doctors are controlled by laws limiting their approach to dealing with patients and many lose their license to practice medicine if they engage in natural remedies and approaches. Medical doctors do not receive formal training in nutrition, nor are they formally educated in natural approaches to healing.

***Doctors can not cure your disease.
Only your immune system can cure your disease.***

I encourage you to investigate and do your own research - because ***you are the expert when it comes to knowing your own body.*** It is my hope that if you are already dealing with a health issue, that you do not succumb to fear and resort only to the limited options presented in the medical approach but that you will consider all the options available for you. It is my sincere hope that the information provided here will empower you to use methods that strengthen your immune system and support your well being and recovery.

Lastly, we just want to say a special THANK YOU for ordering your Immune System Rescue pack today!

Remember the Blood Dragon herbal remedy is very powerful so you need to start slowly as the detoxification effects can be very noticeable. Please follow the Suggested Usage provided on the label.

CAUTIONARY CONSIDERATIONS:

During detoxification rogue cells are processed through the liver for excretion. It is not uncommon for the urine to become quite dark yellow in this process, however if the urine becomes dark brown, this could indicate that the liver is overburdened and needs a break.

Another indication that the liver is overloading is feeling nauseous. Take a few days off from the Blood Dragon and begin again at a lower dosage. Weakness in the heart may exhibit a racing heart sensation. Again, take a few days off and begin at a lower dosage, let your body guide you. It is not uncommon to feel fatigue and mild aches and pains while cleansing – be good to yourself – allow for extra sleep if necessary & make sure to drink at least 2 litres/quarts of pure water daily!

TO EASE DETOXIFICATION:

Consider other companion nutrients to ease the detoxification process:

- ◆ Miracle Mist Transdermal Magnesium
- ◆ Super AGC
- ◆ LifeForce fx
