Introduction

All progress in modern technology farming focuses on industrial efficiency and lowering production costs but not on the actual quality of food produced. This contributes to rampant mineral deficiency in the populations. Conventional farming methods that rely heavily on chemical fertilizers and pesticides deplete the soil of nutrients, along with the processing of foods and many other factors, all add to a poor absorption of key essential minerals including zinc.

More food per acre is produced by hybrid crops but far less zinc exists in these crops than in earlier times of traditional farming. Zinc and other trace elements are lost when foods are processed and refined. Some foods, especially frozen vegetables and some meats, are sprayed with EDTA to retain colour. This chemical removes some of the zinc and chromium from the food.

Vegetarian or near vegetarian diets are much lower in zinc. Stress depletes zinc (and magnesium) very quickly, at times in minutes. An excess amount of calcium in your diet will also decrease absorption, as will trauma, weight loss, and alcohol. Many infants are born low in zinc because their mothers tend to be low in zinc, so in utero the babies do not acquire enough.

Zinc is required for hundreds of enzymes that control functions as varied as eyesight, hearing, health of the skin, hair, nails, connective tissue, sexual function, digestion, immune response and more. Zinc is necessary for optimal growth and development in children, it is needed to release vitamin A from the liver for metabolism of fats, carbohydrates and proteins, for the body's own primary antioxidant (SOD – super oxide dismutase enzyme) for wound healing, to eradicate infections and it is also important for synthesis of DNA and RNA. It is also required to rebuild the fast-growing intestinal tissue, and for the production of bile, and for liver and pancreatic secretions.

The retina of the eye is one of the tissues in the human body most dependent on zinc, along with intestines and the male prostate gland. Zinc is considered to be a calming neurotransmitter as it is required for higher mental functioning and for mental development of the brains neocortex.

TranZinc For Ears, Nose & Throat

Every drop of TranZinc contains a pure Zinc-Boron crystal which is absorbed through the skin into the blood. TranZinc is a miraculous, all-natural treatment that provides healing and relief when applied to desired areas of the body. As a liquid, it absorbs directly into the skin and penetrates deeply to eradicate unwanted pathogens; bacteria, fungus, viruses and parasites.

TranZinc is now available in a handy nasal, ear or throat mist applicator allowing for easy application for relief of sinus congestion, nasal polyps, sore throat, ear infections and blockages. It has also been tremendously helpful for issues with tinnitus.

The inspiration for providing the TranZinc in the easy to use nasal mist applicator came from a customer. A mother called inquiring which product might be helpful for her 12 year old son who was contending with nasal polyps that were seriously interfering with his breathing. The boy had been scheduled for surgery, which is an invasive procedure that is often ineffective because it does not address the underlying cause, leaving the tendency for regrowth of the polyps. His surgery had been repeatedly cancelled and his mother began her

search for an alternative solution. At the time of her call we only had the TranZinc available in a spray bottle application, so I encouraged her to have her son spray twice daily into the nostrils while inhaling deeply to pull the solution deeply into the sinuses. One week later I was happily informed that her son simply blew the nasal polyps out! No need for invasive surgery, his body simply and easily rejected the polyps. We immediately searched out the nasal applicator for ease of use. It turns out that the nasal applicator also provides an excellent delivery system for ears.

Anelectric Infrared Crystalline Formula

Dr. L.E. Schweitzer was an inspired chemist who created the original formula as a mineral biological toxic. This means that it is a mineral formula that has been prepared in such a way as to have the effect of destroying gram-positive or anaerobic organisms, such as infectious bacteria, viruses, parasites and fungus.

This formula has been sold throughout the world since early 1900's and it is not a drug or synthetic petrochemical.

TRANZINC FORMULA

Recognized as a natural and holistic solution that provides blood purification, treating burns, acne, scarring and rashes and many other uses including: feminine hygiene, athlete's foot, ulcers and varicose veins.

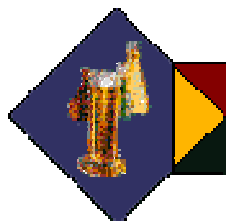

This wonderful mineral product provides a simple and effective multi-purpose health solution to various ailments. It was medically administered by doctors as a disinfectant to treat chronic infections, strengthen the immune system while helping to regulate the heart, brain, kidneys, and other important organs.

TranZinc is a time tested formula produced according to the original crystalline method.

Zinc is widely used to help reduce the duration of colds and harmful bacteria like streptococci. It is also used as a wound agent to promote accelerated healing on the skin.

What is Anelectric?

TranZinc Crystalline Formula is anelectric; meaning it generates infra-red heat caused by negative ions travelling at the speed of light. These are non-frictional betionic, wet electrons. TranZinc is a true osmotic solution. This is the secret of the amazing healing and preventative powers of the TranZinc formula.

Quantum Chemistry

Wet Electrons

A Multipurpose Healing Solution

It is a universal disinfectant which controls microorganisms (germs) but does not destroy normal cells and tissue. Known as a universal solvent which helps to thin and purify the bloodstream; yet non-toxic, non-irritating and soothing to delicate mucus membranes. It has been proven to stimulate tissue growth and assists nature in restoring normal function. It is the original transdermal formula; a truly miraculous solution that can provide healing and relief when applied onto the skin and/or used internally.

TranZinc Benefits:

- ◆ Nasal Polyps
- ◆ Acne & Skin eruptions
- ◆ Reduces Scars
- ◆ Eczema & Psoriasis
- ◆ Eliminates germs
- ◆ Purifies bloodstream
- ◆ Balances pH
- ◆ Sore Throat
- ◆ Stomach Ulcers
- ◆ Ulcers
- ◆ Varicose Veins
- ◆ Boosts Immunity
- ◆ Eye issues
- ◆ Athlete's foot
- ◆ Hemorrhoids
- ◆ Gum Problems & Oral Care
- ◆ Ear Problems
- ◆ Soothes Burns & Sunburn
- ◆ Rashes, Hives, Poison Ivy
- ◆ Insect Bites
- ◆ Nail Fungus
- ◆ Bruises
- ◆ Yeast Infection
- ◆ Venereal Disease

TranZinc Formula Is 100% Natural

1. Universal Disinfectant - controls microbes, but does not destroy normal cells and tissue.
2. Universal Solvent - helps to purify the bloodstream.

3. It is non-irritating to delicate mucous membranes, and it assists in soothing these membranes. It penetrates each layer of skin to eradicate unwanted micro-organisms.
4. It is non-toxic and odourless. It works as a deodorant, alkalizes, assists nature to restore normal function.
5. It is pH balancing, anti-inflammatory, improves detoxification of cells and tissues.

TranZinc As a Historical Remedy

TranZinc Formula was known early in the 20th century as a mineral biological toxic; meaning that it is a mineral formula prepared in such a way as to have the effect of destroying gram-positive or anaerobic organisms, such as infectious bacteria, viruses, parasites and fungus without harming healthy tissues.

Formulated With Three Essential Trace Elements

TranZinc is made using a proprietary method combining zinc carbonate, boric acid, salicylic acid in Ellis Distilled and structured water.

Zinc: A fundamental nutrient in supporting proper neurological as well as body functions, and present in all human cells and tissues, Zinc is required to manufacture enzymes that preserve the skin, strengthen the immune system, aids digestion, metabolizes fat, proteins, and carbohydrates while helping to regulate the heart, brain, kidneys, and other important organs. Zinc is needed for immune function, wound healing, blood clotting and thyroid function. Zinc plays a role in antioxidant defence and DNA repair, structure and stabilization. Zinc is crucial for a wide range of processes including synthesizing proteins and DNA, and the division of cells. Zinc is known to be an essential component of DNA-binding proteins, as well as copper/zinc superoxide dismutase and several proteins involved in DNA repair.

Boron: Due to soil depletion this trace mineral is largely missing from our natural food sources. This trace mineral has been linked to providing relief from pain and is used medically to help alleviate arthritic symptoms like inflammation and immobility. It has been found to have the ability to strengthen bone density and is given to help sufferers of osteoporosis. Conversely, lack of boron has been linked to receding of the gum lines and tooth decay. Medical

experts believe that boron has the ability to prevent allergies by killing the inflammatory bodies responsible for inducing allergic symptoms.

Salicylate: This is a naturally occurring chemical produced by plants that help to protect them against disease, highly concentrated in a range of fruits and vegetables and is commonly known as the active ingredient in the drug aspirin. Foods sources rich in salicylate are peppers, berries, tomatoes and basil. Salicylate has been documented to provide relief from pain and injury, as well as reduce fever and skin inflammation.

What is Ellis Distilled & Structured Water

Miracle Products now prepares all our elixirs in Ellis distilled and structured water. John Ellis is referred by many as a genius. His machine holds 13 patents and 332 approved FDA studies on remarkable healing effects of consuming Ellis water. This extraordinary machine produces perfect structured water that I like to refer to as Garden of Eden water.

Hydrogen Bond Angel

The hydrogen bond angle of water is of major significance if you are interested in health and longevity. It is recommended to always drink water with a hydrogen bond angle above 108° because water with a bond angle above 108° makes the oxygen bioavailable to eliminate the effects of pathogens and neutralises toxins; while making the hydrogen available as fuel for the body.

Tap water generally has a bond angle of 104° , bottled water is between 101° & 104° and regular single pass distillers produce a 101° bond angel. These low bond angels lock the hydrogen and oxygen in the water producing “zero energy” water. Called thus because these waters require 30 times more energy before it splits into hydrogen and oxygen. Antoine Lavoisier, the founder of modern chemistry said, “the body burns hydrogen to stop disease.” In other words, hydrogen is the match which ignites the disease and oxygen destroys it. Think of the disease, like cancer, as the charcoal on a grill and the oxygen as the fuel that destroys it. - *The Faraday Twins, written by John Ellis and John Christian Ryter*

Nobel Prize winner Albert Szentgyorgy, makes a statement about the type of water we should consume, “The one that produces the most hydrogen energy is

the fuel of life.”

Think also of water whose hydrogen and oxygen molecules have split as the bond angle of the hydrogen spreads from 104° to 114° (accomplished by the water molecule expanding in a distiller filled with hot water where every 30 seconds a drop of cold water is introduced hundreds of times per cycle) – and this occurs hundreds of times as the distillation process permanently changes the bond angle of the water from 104° to 113.8° or 114° .

Evidenced by the US Patent Office and the 13 patents which John Ellis owns on his steel distiller’s worldwide, the bond angle will expand to 113° to 114° . What is extraordinary about this system is that when the water cools, the bond angle will remain at 113.8° to 114° . In other words, *the expansion of the bond angle is permanent.*

Dr. Guy Abraham, MD (UCLA Medical School) did many independent studies. He performed tests on a variety of diseases and was amazed at how fast the Ellis distilled water killed the host toxins. Abraham used five Electron 5 distillers and continued running hundreds of blood tests at UCLA.

When the hydrogen and oxygen molecule splits, you get the effect; hydrogen heat and oxygen which kills not only blood stream borne diseases but in this biological pollutant age we live in, Ellis water also removes anabolic steroids, mercury, formaldehyde and aluminium (which causes both autism and Alzheimer’s disease).

His conclusion was voiced in a letter to John Ellis:

“You can’t argue with something you can measure. The results speak for themselves. We can measure the ability of blood (which is 94% water) to go through a membrane and into the cells. Nothing is even close to your water. Your hydrogen bond angle is 10 degrees greater than ordinary water. No wonder we’re getting these results. You changed the properties of water!

Hazards of Low Energy Water

Low energy water takes energy from your food to reach equilibrium. Your immune system needs this energy to fight disease. Also, the electrical system in your body requires energy to split water into hydrogen and oxygen. Water with

a bond angle of 114° enables ease of access to both the hydrogen (fuel of life) and oxygen (neutraliser of toxins and pathogens).

Zinc Deficiency Symptoms

Symptoms of zinc problems include hyperactivity, ADHD, anxiety, irritability, nervousness, emotional instability, mood swings, bipolar disorder and many other mental and emotional symptoms. Zinc and copper are maintained in a delicate balance. Many menstrual irregularities such as PMS are related to imbalances of magnesium, zinc and copper.

How to Test For Zinc Deficiency

There are several ways to assess zinc status in the body but most of them prove to be unreliable. Serum blood tests are generally useless, as zinc does not accumulate in the blood serum. Testing white blood cell zinc levels to assess total body zinc is also not very reliable. Assessing zinc using analysis of urine and feces are not considered reliable either because they depend on the last foods eaten. We have found that the most effective and reliable method to measure tissue zinc levels is an OligoScan.

OligoScan is designed for precise evaluation of bioavailability of minerals, trace elements and the rate of toxic metals in living tissues. The measurement is made on the surface of the hand. The advantage of epidermis analysis as opposed to a secretion one is that it gives more stable picture. The cutting edge Oligoscan makes, in real time, a precise analysis of the minerals in the skin and peripheral blood vessels. No biopsy, blood or hair sample is needed. Oligoscan uses Spectrophotometry to measure the optical density of the trace elements, minerals and heavy metals, currently present in the tissues.

Zinc Bioavailability

Only about 30% of the zinc that we get from food and supplements is absorbed. Common contributing factors are malabsorption issues related to inefficient digestion and low levels of enzymes. Transdermal use of zinc bypasses these issues as it is readily absorbed through the skin into the bloodstream.

Transdermal Technology

Every drop of the liquid contains a pure zinc-boron-salicylate crystal, which is absorbed through the skin into the blood and tissue. There are thousands of pores on every square centimetre of your skin which absorb directly into the bloodstream and lymphatic system. Transdermal applications of nutrients bypass the digestive system and convey active ingredients directly into the body where they are needed most.

When used externally it soothes burns, cuts, blisters, rashes, hives, poison ivy, insect bites, eczema, psoriasis, nail fungus, athletes foot etc. It also repairs damaged skin such as scarring and acne. Plus it underarm odour, so spray it under your arms. Reduces varicose veins, bruises, hemorrhoids, and takes the sting out of sunburns.

Depression - Think Zinc!

A very important trace mineral involved in at least 100 enzyme systems in the brain alone; is known to influence mental and emotional function and deficiency is known to cause depression. Zinc is considered to be a calming neurotransmitter as it is required for higher mental functioning and for mental development of the brains neocortex.

How to Use TranZinc

TranZinc will lose about 95% of its healing properties (the anelectric effect) if it comes into contact with metal so use plastic or wooden spoon, glass or plastic funnel if measuring/decanting and remember to remove any jewellery that is in the application area.

Do Not Let TranZinc Come In Contact With Metal. Make sure to use glass, plastic or wood for pouring and/or measuring.

Ear, Nose & Throat Applicator

Use 1-2 mist per each nostril or throat and/or 1 mist per each ear. For ear application it is helpful to tilt the head to the side when applying.

Internal Uses:

TranZinc can be used internally as a mouthwash, feminine hygiene as a douche, digestive disorders, venereal diseases, purifying blood and normalizing pH balance. For internal use, start with 1 tsp. in a small amount of water.

We have found it's best to dilute TranZinc with distilled water when using as a mouthwash, feminine wash or taking internally as it can be quite drying to sensitive tissues.

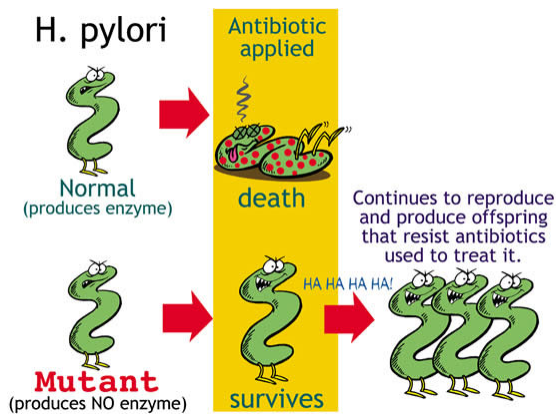

Zinc and Methylation

Zinc plays a significant role in methyltransferase, which are a large group of enzymes that are essential to the processes of the methylation cycle. Zinc is present in the cell nucleus and chromosomes. Zinc stabilizes the structure of DNA, RNA and ribosomes. Numerous enzymes associated with DNA and RNA synthesis are also zinc metalloenzymes, including RNA polymerase.

Stops Unhealthy Germs without Causing Mutations

Doctors know that antiseptics and antibiotics kill germs and healthy cells of the human body, resulting in new unhealthy germs, which the antibiotics cannot kill. There is a widespread acceptance of Biological Pleomorphism, which is the activity of a germ changing to a new form, to adapt to its new environment. Thus, when one changes the cellular environment with antibiotics, new germs develop in new qualities and virulence that increase the problem. In addition, because the healthy cells of the body are killed and depleted, as well as the

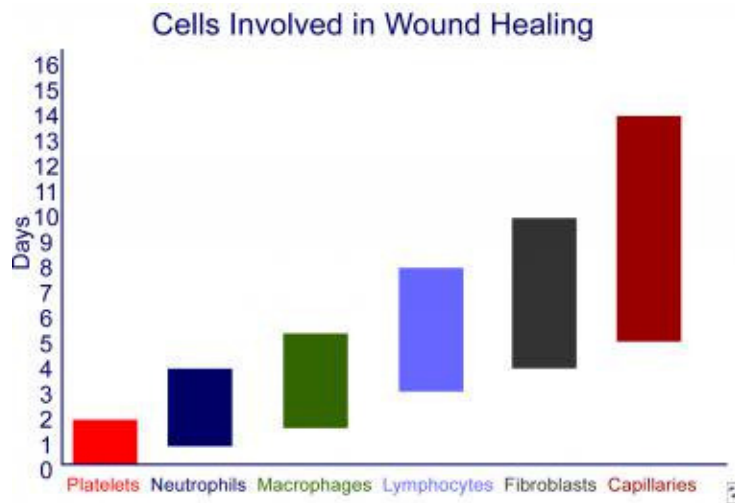

unhealthy ones, important healthy flora levels are depleted, causing repeated infections to become more likely.

TranZinc Formula
 stops the growth of
 anaerobic bacteria, fungi and
 viruses because it is a true
 disinfectant!

Increases Capillary Growth

Laboratory analysis indicated a positive increase in phagocytic cell activity in destruction of bacteria and other foreign substances, without any harm to surrounding tissue. Increases in fibroblastic and lymphocytic activity with increased epithelial cell growth, resulting in rapid healing of injured tissue, has also been observed.

Rejuvenation & Beautification Effects

TranZinc formula aids in the rebuilding and restructuring of tissues during the “healing crisis” and “genetic restructuring”. It penetrates through the skin and

increases the oxygenation and circulation to the tissue, which improves the metabolic function.

*Use it on your face to
smooth out wrinkles,
increase skin elasticity, and
maintain the ecology of your
skin!*

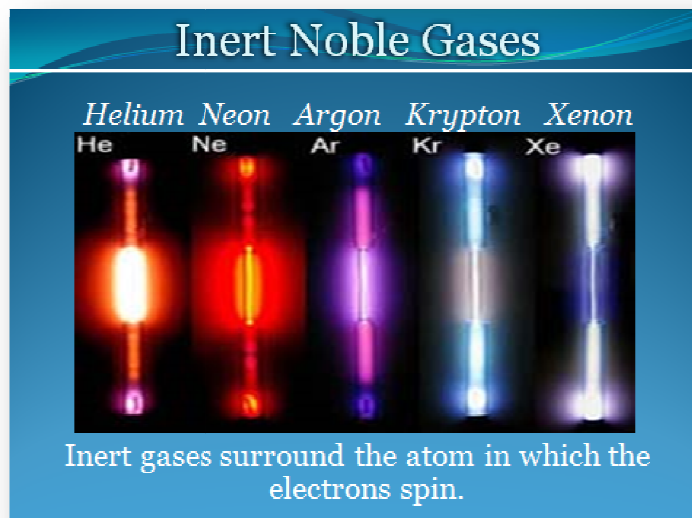

Safety

For over 95 years in the use of the TranZinc formula, no contraindications have ever been observed.

TranZinc is Formulated and bottled in Australia!

Dynamically Enhanced® Nutrition

All Miracle Products are Dynamically Enhanced® using proprietary advanced technology. Our Tesla Scalar Vortex generator produces Infrared - Quantum Sound with 528 Hz & Inert Noble Gasses, each known to provide specific information and beneficial resonant health effects.

John Stuart Reid (a pioneer in acoustic research and cymatic measurements) has proven that 528 is essential to the sacred geometry of circles and spirals consistent with DNA structuring and hydrosonic restructuring. 528Hz

frequency is utilised by bio-chemists to initiate repair of damaged DNA and is known as the “Transformation and Miracle” frequency.

Biochemist Steve Chemiski found that the 6 sided clear clusters that support the DNA double helix vibrate at the specific frequency 528 Hz. Restoring DNA to its original, near-perfect state through resonance of the essential 528Hz vibrational effect creates profound benefit: increased life force energy, clarity of mind, awareness, activation of creativity and ecstatic states like deep inner peace.

There are incredible benefits from this energy when carried into cells by Dynamically Enhanced® supplements. Scalar enhancement is known to strengthen DNA bonds making it more resistant to damage, cleanse the blood, fortify the immune system and restore overall vitality.

In addition, Scalar energy has other amazing properties. It can cancel out the harmful effects of radiation such as computers, microwaves, other appliances and the damaging electromagnetic fields cause by 5G.

Amazingly, once a supplement has been Dynamically Enhanced® the effects can actually grow stronger weeks or even months after being embedded. The effects are so powerful that it has even been shown to repair itself. Scalar restores coherence, even after disruptive exposure to radiation, like X-rays and 5G.
