KINETICO GEMINI

KINETICO POLARIS

KINETICO CARINA

KINETICO LYRA

Let's take a look inside

High quality taps inside and out

Manufactured according to NSF regulations, our taps are stylish, durable and easy to install, all you have to do is choose the perfect fit for your kitchen.

The whole tap has been designed with an NSF certified internal plastic cover. This helps to avoid any metal contamination of the water. The treated water will never be in contact with the metal part of the tap, ensuring the water is of the highest purity.

The high quality taps have been manufactured under strict quality standards to meet NSF requirements.

Highly reliable ceramic valve manufactured at GE ULTEM-CERAMIC and GE SHANK-NORYL. The specific manufacturing process ensures a longer life and offers greater comfort when used.

This symbol indicates when a tap is suitable for use with a Reverse Osmosis filtration system.

Please note: All 2, 3 and 4 way taps are not suitable for loft tank applications.

3 in 1

Pour different types of water from one spout - simply at the turn of a handle.

Enjoy quality, filtered drinking water or wash the dishes all from the same tap.

4 WAY

Kinetico Pegasus

Top of the range, the Kinetico Pegasus exudes quality. The 4 way tap can provide hot, cold, filtered and softened water all from the same spout - now that's impressive!
