STYLISH & MODERN Stainless Steel

For the first time landscape design will not be compromised by function with our innovative range of precision made stainless steel grates, both designed and manufactured in the UK.

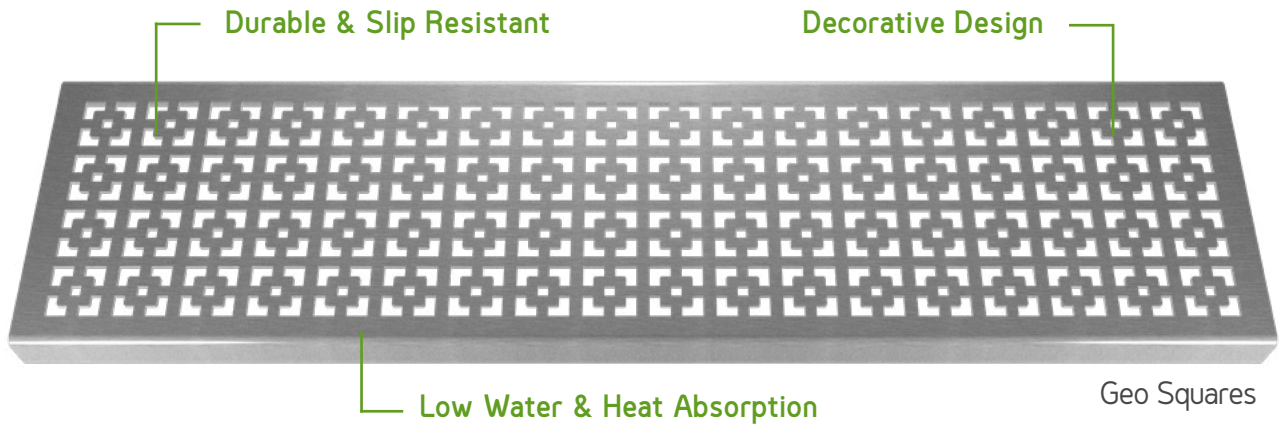

Our aesthetically designed and robust linear stainless steel covers are manufactured from 70% recycled stainless steel and feature a beautiful brushed finish. We have several designs available in our standard 5 and 3 inch ranges which can also be coordinated with bespoke manhole or gully covers.

SOPHISTICATED & ELEGANT

Cast Iron

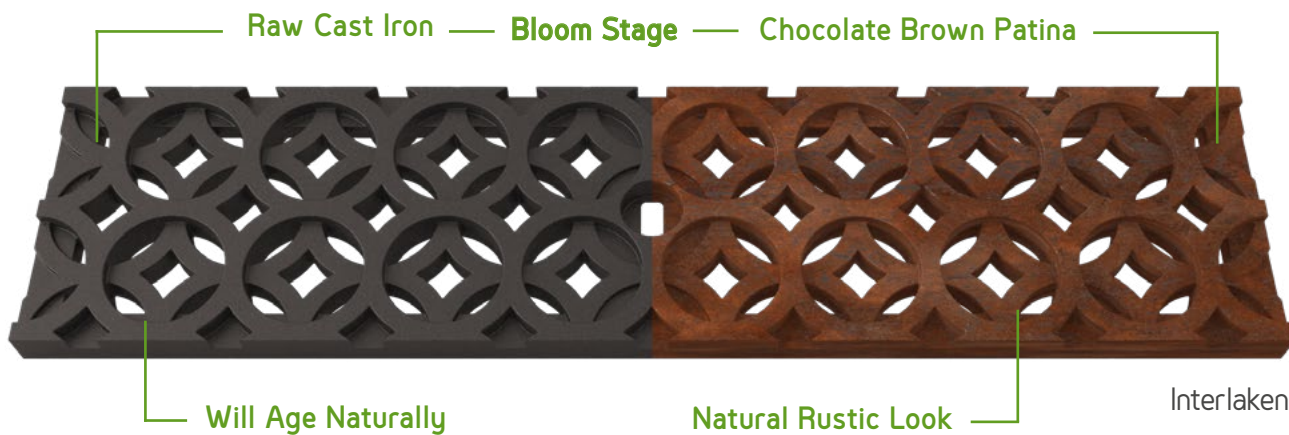

Contemporary styles are not for everyone, and so with this in mind we provide a range of standard cast iron grates that help to reintroduce the charm and elegant design detail of yesteryear. The perfect addition to any classic landscaped area.

Manufactured from recycled cast iron, our covers will age naturally and develop a golden bloom to a dark patina, giving these particular covers a natural rustic look suitable for any classic scheme. We can even alter or delay the ageing process using a number of special treatments (see page 15).

Lighting

Why not add some warmth to your garden scheme with our beautiful strip lighting. Fully compatible with all our channels, for more information please visit our website.

SMART & NATURAL

Jonite Stone

Our Jonite stone grates are ethical composite stone channel covers which help to provide a smart natural look. We have several Jonite designs available in a variety of sophisticated colours.

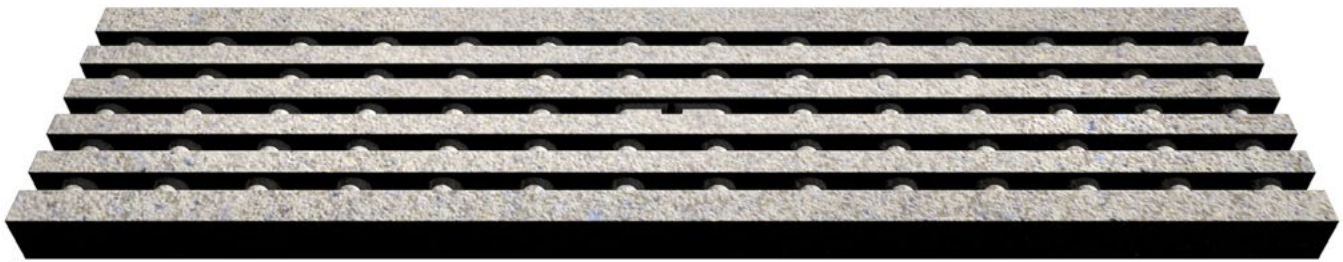

These products are made with a minimum of 30% recycled materials and as such are green label certified. They also have a lower water absorption rate than natural stone, which means the covers maintain their colour when in contact with water.

FINISHES

POST RUST TREATMENT

Our cast iron comes raw, starting out grey in colour but upon contact with water begins to rust into a bright orange colour. This will eventually wash or wear away, leaving behind a rich, chocolate brown patina.

We offer a pre-rusting service where we provide the covers ready rusted and then apply a special protective treatment post-rust that will maintain the colour in a darker and more attractive finish.

Available for Cast Iron

POWDER COATING

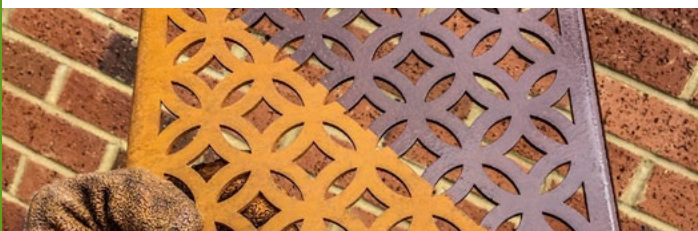

Powder coating is a metal finishing process that allows the product to be textured in almost any RAL colour or shade you require. This long-lasting, highly durable and economical finish will be more resistant against scratches, chipping, wear, and fading.

Available for Cast Iron & Stainless Steel

CORTEN SEALANT

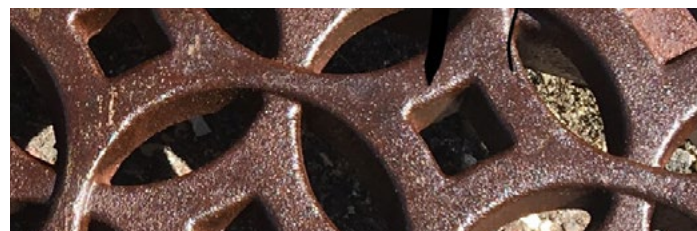

Similar to our Post Rust method, we can apply a similar application to a corten steel. Known for its rusty nature, we have a sealant which when applied to this rust, seals the surface and achieves an aged chocolate brown finish.

Available for Corten

BAKED OIL

The baked on oil finish is an application that uses recycled cooking oil as the coating material. It is an aesthetic treatment that creates an aged look. As the oil wears off it will provide a smooth, graceful transition from installation to final patina.

Available for Cast Iron

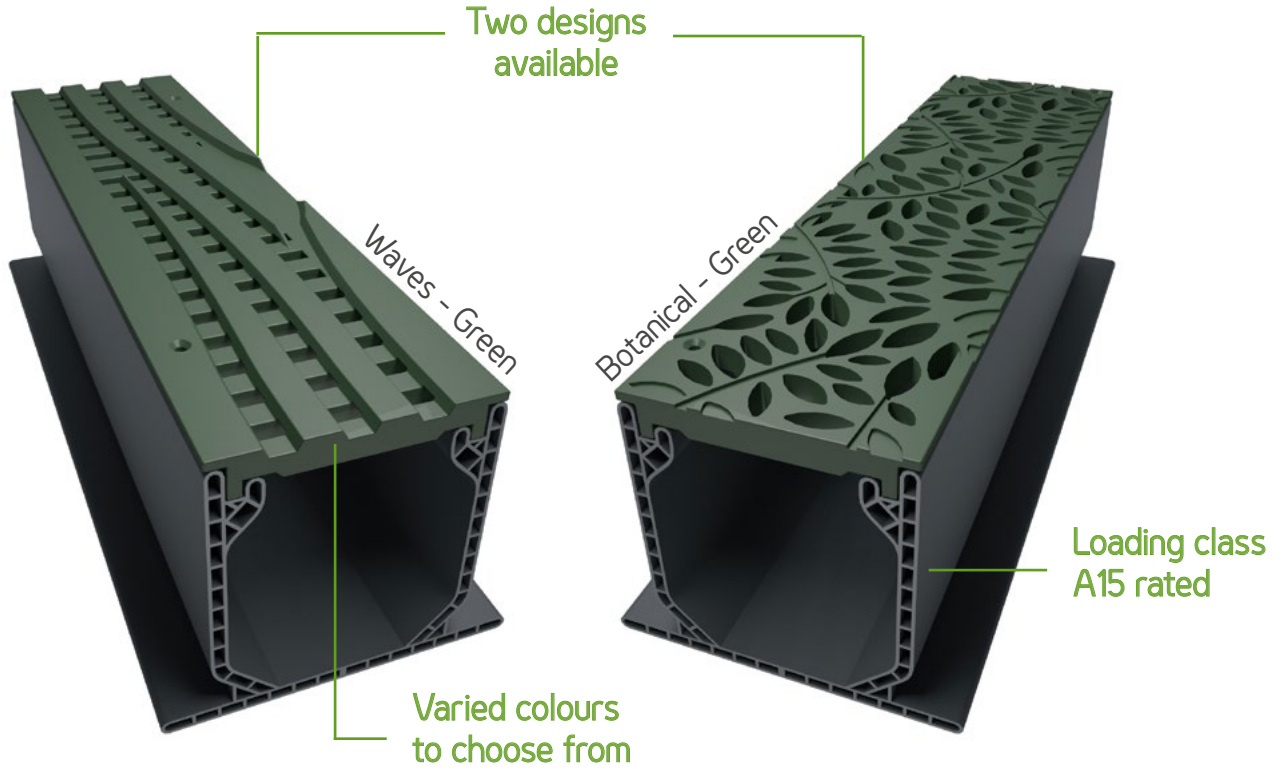

ECONOMICAL & VERSATILE Essential Range

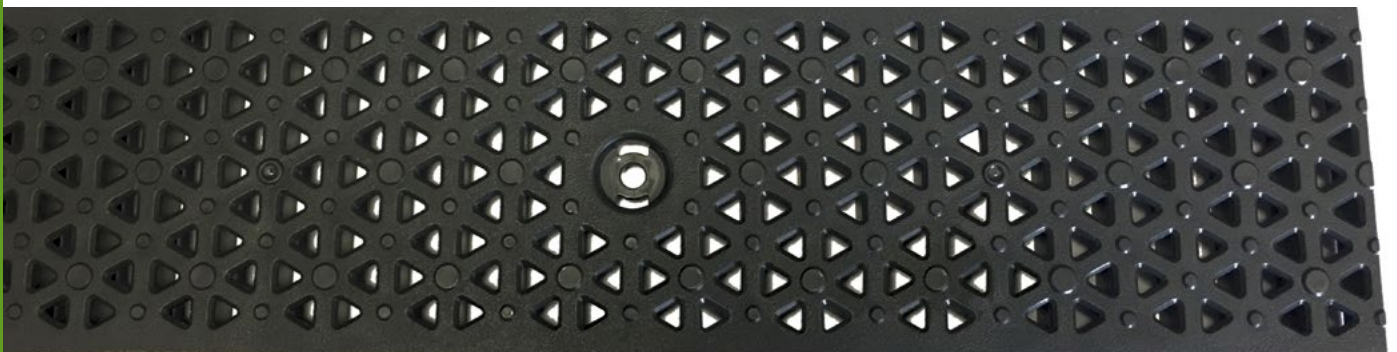

Our essential range has been designed to meet today's demand for products in which they should be as beautiful as they are functional - but equally just as cost-effective.

These decorative grates are available in both plastic in a range of colours, as well as galvanised steel. The range itself features a number of customer-tested designs ideal for any application or setting.

ROBUST & DISTINCTIVE

Decorative Manhole & Gully Covers

In addition to our range of decorative linear grates and slots, we offer non linear square and circular gully covers.

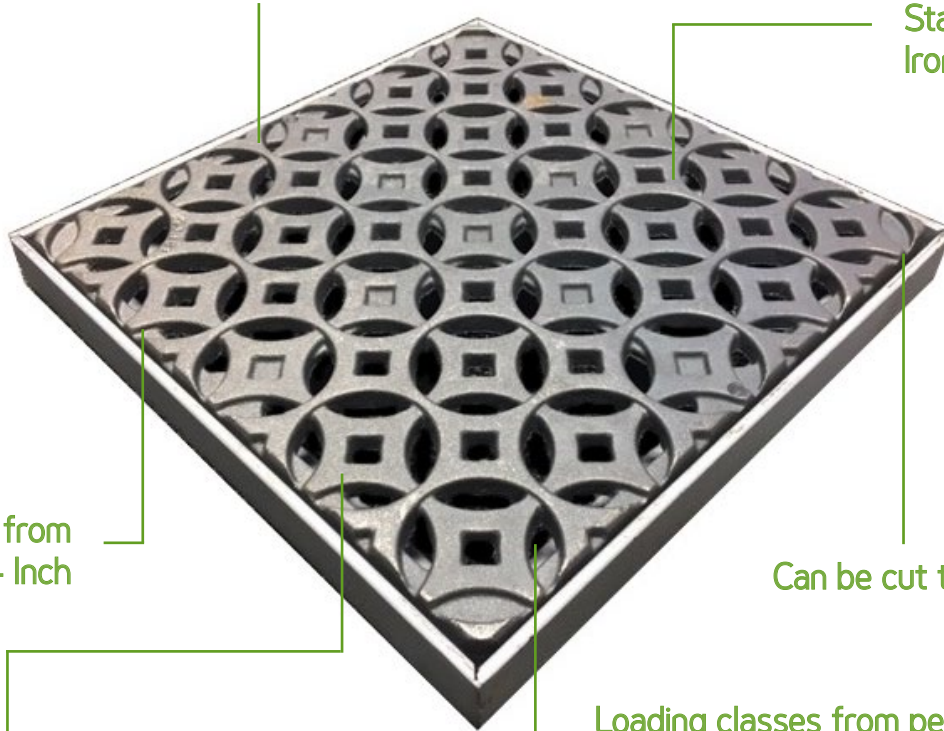

They are available in a multitude of sizes and designs, ranging from 4 inch round to 24 inch square. Available in a wide range of sizes, these covers are suitable for individual homes and go right up to prestigious town and city centre developments.

SQUARE

Lightweight, easy to install

Covers available in Stainless Steel, Cast Iron & Jonite Stone

Sizes range from 6 to 24 Inch

Can be cut to size

Loading classes from pedestrian to heavy vehicular traffic

ROUND

Sizes range from 4 to 24 Inch

Various finishes available

Standard & Bespoke frames available to hold all covers

Bolt holes for fixing

FRAMES

We offer three types of frame for our gully covers. One is made of a PVC plastic, which fits two of our standard sizes, the rest are made in either stainless or galvanised mild steel. These offer stronger support for heavy traffic projects. Each frame will fit specific covers and sizes available.

Available in a range of different steels and finishes, we can offer square frames to hold our square gully covers. With sufficient bolt holes they can be fixed in place on various different surfaces.

Rated for pedestrian loading only, our plastic frames are the perfect option for gardens or patios to hold our square gully covers. Each plastic frame has a 110mm locking outlet which allows easy fixing to standard drainage pipes.

We also offer circular frames for our circular gully covers. Also available in a range of different steels these are well capable of heavy duty applications. Also containing bolt holes to fix down on various different surfaces.

UNLIMITED POSSIBILITIES

Bespoke Projects

As well as offering a wide range of products, our in-house team can create beautifully unique products.

We have worked with Grosvenor Estates on numerous projects, Hackney Council and at Armstrong House at Newcastle University to name just a few. Our bespoke manhole covers feature within the precinct outside Canterbury Cathedral and we have even been involved in several special projects for award-winning garden designers and other notable industry experts and professionals.

UNIQUE & ORIGINAL

OTHER PRODUCTS

CURVED GRATES

The sweeping lines of our curved grates will provide your project with a softer look where required. Here we can see an example of a curved channel grate in our highly popular 'Interlaken' design, which surrounds and finishes a central water feature. These can be provided with frames, and bolt down fixings for added security.

TREE GRATES

These decorative tree grates exude sophistication and will add an individual rustic charm to your landscape project. The grates are available in a wide variety of designs and sizes, provide the space for trees to grow, and allow for extra pedestrian traffic. Supporting metal framework can also be provided.

STREET FURNITURE

The rustic artisan charm of cast iron has been extended into a range of street furniture which is perfect for private gardens and open spaces. This range includes benches, bollards and bicycle racks. These curvaceous 'Spak' bollards are made from heavy duty cast ductile iron, they can come in powder coated finish and feature a tamper resistant fastener for fixing securely.

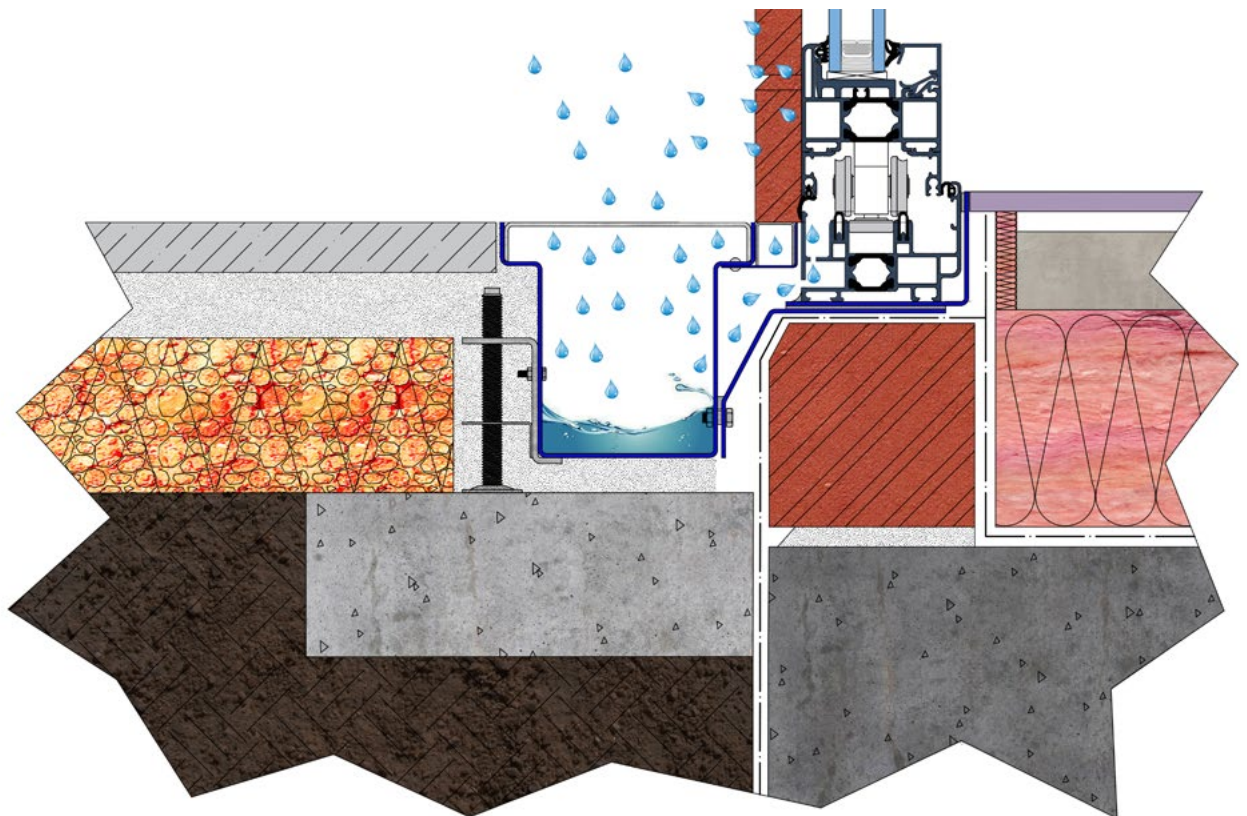

AQUALEVEL

THRESHOLD DRAINAGE

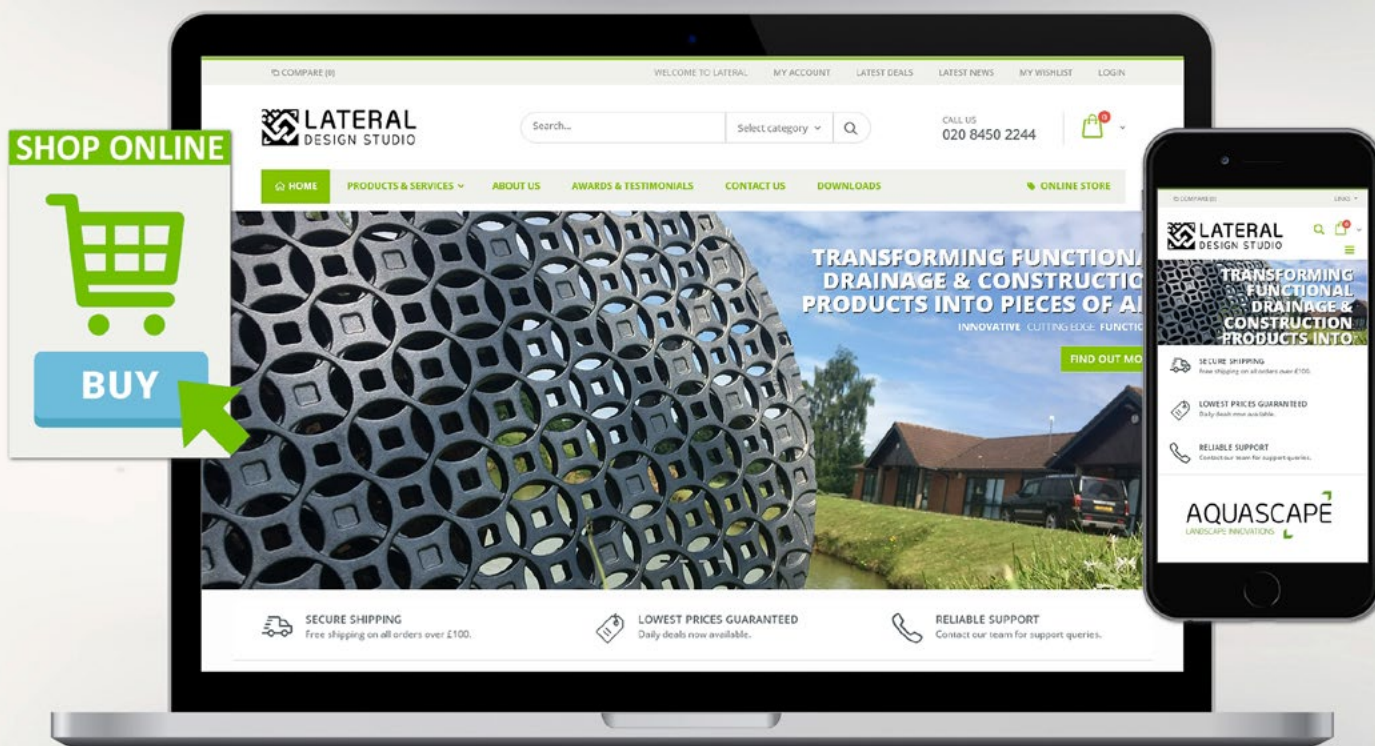

Fully Integrated Level Threshold Access Drain System

We offer a fully adjustable, seamless integration between our drain solution and your door threshold. Our system works with all door sections and meets both architectural and aesthetical requirements without compromising on functionality.
