Essential

Drainage

Plastic 3 Inch

Our exciting new range of 3 inch channels are slimmer and just as robust as ever. They offer a great alternative to our main 5 inch range allowing narrower drainage solutions to be applied to different areas around your garden or patio. They even come with a whole host of accessories including end caps, coupling, 90 degree elbows, reducer hubs and more.

Cutting Edge
Slimmer Designs

As well as our decorative plastic options many of our most popular 5 inch designs have also been redesigned for our 3 inch range of channels. This includes designs in stainless steel, cast iron and even Jonite composite stone.
