Benefits of Errorless Activities

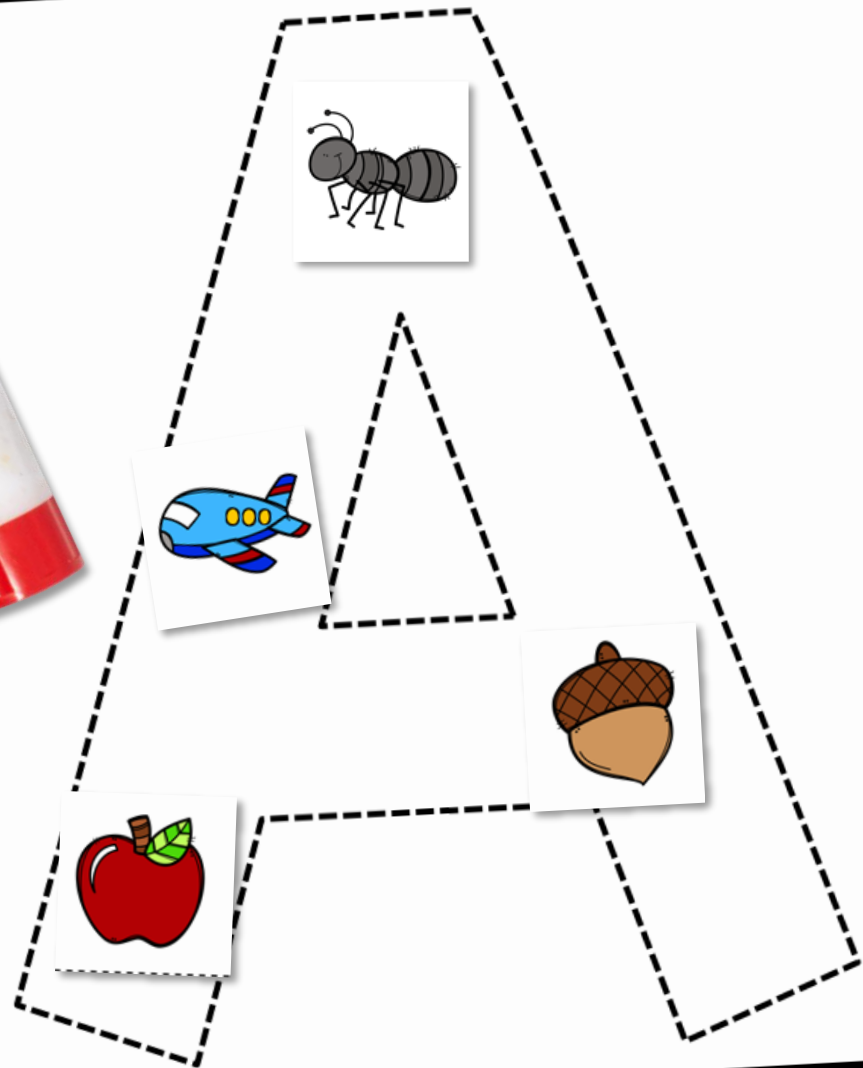

- ✓ Introduce task routines – students learn how to follow their schedule
- ✓ Increase confidence – these might be the first tasks students can complete independently. Imagine the confidence boost and pride when a student shows their completed work that didn't require staff help!
- ✓ Independent completion – errorless tasks can be done completely independently. This means even new students and those who haven't mastered many skills can participate in independent work stations!

There are no wrong answers with errorless tasks. Your students can participate in independent work even if they don't have a long list of mastered tasks (yet). If you're short on staff or need time to work 1:1 with another student, errorless work can be a huge asset to your classroom.

Letters Cut and Paste

1. Write your name.
2. Trace the letter.
3. Cut out the pictures.
4. Glue the pictures.

- ✓ A-Z in capital and lowercase formats
- ✓ Beginning sounds
- ✓ Great for letter of the week units

“This was a great resource! You have a motor skill of cutting and gluing. This activity was used for independent work, knowledge retention, and to teach new skills. Also I find errorless activities gives students a feel of success.”

Counting 1-10 Cut and Paste

"This is a great resource! I love how it is minimal prep, which is hard to find when you need to work on errorless learning."
